Documents Massachusetts. General Court. House of Representatives,1923 **Journal of Education and School World** ,1888 *Public vs. Private* Robert N. Gross,2017-12-01 Americans today choose from a

dizzying array of schools loosely lumped into categories of public and private How did these distinctions emerge in the first place and what do they tell us about the more general relationship in the United States between public authority and private enterprise In *Public vs Private* Robert N Gross describes how more than a century ago public policies fostered the rise of modern school choice In the late nineteenth century American Catholics began constructing rival urban parochial school systems an enormous and dramatic undertaking that challenged public school systems near monopoly of education In a nation deeply committed to public education mass attendance in Catholic schools produced immense conflict States quickly sought ways to regulate this burgeoning private sector and the competition it produced even attempting to abolish private education altogether in the 1920s Ultimately however Gross shows how the public policies that resulted produced a stable educational marketplace where choice flourished The creation of the educational marketplace that we have inherited today with systematic alternatives to public schools was as much a product of public power as of private initiative Gross also demonstrates that schools have been key sites in the development of the American legal conceptions of public and private Landmark Supreme Court cases about the state's role in regulating private schools such as the 1819 *Dartmouth v Woodward* decision helped define and redefine the scope of government power over private enterprise Judges and public officials gradually blurred the meaning of public and private contributing to the broader shift in how American governments have used private entities to accomplish public aims As ever more policies today seek to unleash market forces in education Americans would do well to learn from the historical relationship between government markets and schools

Politics without Vision Tracy B. Strong, 2012-03-01 Magisterial a frequently surprising treatment of major political thinkers Perspectives on Politics From Plato through the nineteenth century the West could draw on comprehensive political visions to guide government and society Now for the first time in more than two thousand years Tracy B Strong contends we have lost our foundational supports In the words of Hannah Arendt the state of political thought in the twentieth and twenty first centuries has left us effectively thinking without a banister *Politics without Vision* takes up the thought of seven influential thinkers each of whom attempted to construct a political solution to this problem Nietzsche Weber Freud Lenin Schmitt Heidegger and Arendt None of these theorists were liberals nor excepting possibly Arendt were they democrats and some might even be said to have served as handmaidens to totalitarianism And all to a greater or lesser extent shared the common conviction that the institutions and practices of liberalism are inadequate to

the demands and stresses of the present times In examining their thought Strong acknowledges the political evil that some of their ideas served to foster but argues that these were not necessarily the only paths their explorations could have taken By uncovering the turning points in their thought and the paths not taken Strong strives to develop a political theory that can avoid and perhaps help explain the mistakes of the past while furthering the democratic impulse Confronting the widespread belief that political thought is on the decline Strong puts forth a brilliant and provocative counterargument that in fact it has endured without the benefit of outside support A compelling rendering of contemporary political theory Politics without Vision is sure to provoke discussion among scholars in many fields
