The Emergence of Institutions Elke Weik,2022-08-27 This book presents an experiential aesthetic affective approach to the study of institutions Drawing on institutional sociology hermeneutics phenomenology and process philosophy it conceptualises institutions as collective experiences with their own self promoting and self propelling powers Instead of seeing institutional emergence change and decline as the result of actors interests and manipulations this book re establishes the importance of factors beyond human design and intervention Drawing on process theory it shows how ideas norms and values can form self stabilising configurations that affect people without conscious realisation It complements current thinking about institutions by showing how institutions constitute people long before people constitute

them With the help of authors as diverse as Antonio Damasio A N Whitehead J W von Goethe and Max Weber Elke Weik crafts a perspective that allows us to understand institutions as aesthetic and affective powers in their own right This book is for researchers interested in process theory institutional and organisational studies hermeneutics and aesthetics
