Redefining Education and Development Kaitano Dube, 2024-10-18 The book aligns with the United Nations Sustainable Development Goals SDGs particularly Goal 4 which focuses on quality education It explores the evolving role of education as a critical driver for achieving all 17 SDGs by providing a platform for discussing innovative educational models and theories that foster sustainable development The book takes an interdisciplinary approach merging educational theory developmental practice and human psychology to address complex global challenges hindering sustainable development The book includes case studies and empirical research such as exploring student entrepreneurship in the agricultural sector and the factors bridging the gap between entrepreneurial intention and venture creation These examples provide readers with practical applications of theoretical concepts and demonstrate the real world impact of educational innovations which is at the core of education delivery for all and how education touches on other areas of the SDGs The book offers valuable insights for policymakers educators and development practitioners by presenting research and theory based analyses It suggests ways to improve the academic environment to foster entrepreneurship and innovation which are key to economic development and job creation especially in regions with high youth unemployment rates The content suggests educational reforms that are responsive to the changing societal and economic landscapes The book's blend of theory and practice targets a broad audience including academic scholars students development agencies non governmental organisations and policymakers It seeks to engage these diverse readers in a conversation about the future of education and its role in achieving sustainable development In summary the book seeks to provide a comprehensive exploration of the nexus between education development and human needs in the context of the

SDGs offering innovative perspectives and practical solutions to equip readers to contribute to sustainable global development

HELP: A Dynamic Hospital Information System Gilad J. Kuperman, Reed M. Gardner, T. Allan Pryor, 2013-03-12 This monograph series is intended to provide medical information scientists health care administrators health care providers and computer science professionals with successful examples and experiences of computer applications in health care settings Through the exposition of these computer applications we attempt to show what is effective and efficient and hopefully provide some guidance on the acquisition or design of information systems so that costly mistakes can be avoided The health care industry is currently being pushed and pulled from all directions from the clinical side to increase quality of care from the business side to improve financial stability from the legal and regulatory sides to provide more detailed documentation and in a university environment to provide more data for research and improved opportunities for education Medical information systems sit in the middle of all these demands They are not only asked to provide more better and more timely information but also to interact with and monitor the process of health care itself by providing clinical reminders warnings about adverse drug interactions alerts to questionable treatment alarms for security breaches mail messages workload schedules etc Clearly medical information systems are functionally very rich and demand quick response time and a high level of security They can be classified as very complex systems and from a developer's perspective as risky systems
