These authors also demonstrated a positive relationship between the frequency of use of the Internet and the frequency of use of the Internet for social networking. The results of this study suggest that the frequency of use of the Internet for social networking is positively related to the frequency of use of the Internet for social networking. The results of this study suggest that the frequency of use of the Internet for social networking is positively related to the frequency of use of the Internet for social networking.

These authors also found that the use of a single, non-validated questionnaire to assess the prevalence of depression in the community is not sufficient. They also found that the prevalence of depression was higher in the community than in the clinical setting. This suggests that the prevalence of depression in the community is higher than in the clinical setting.
