The automotive industry underwent great change in the 1960s and the early 1970s. The continuing trend toward market consolidation, the proliferation of sizes and nameplates, and the need for speed characterized this period, loosely labeled as the muscle car era. This is an exhaustive reference work to American-made cars of model years 1966-1972. Organized by year and summarizing the market annually, it provides a yearly update on each make's status and production figures, then details all models offered for that year. Model listings include available body styles, base prices, engine and transmission choices, power ratings, standard equipment, major options, and their prices, curb weight, and dimensions, interior and exterior paint color choices, changes from the previous year's model, and sales figures. Also given are assembly plant locations and historical overviews of each model nameplate. Kawasaki Service, Repair Handbook, 1977 **Motor Age**, 1920 **Handbook of Chemical and Biological Warfare Agents** D. Hank Ellison, 2010-12-12. With terrorist groups expanding their weapons of destruction beyond bombs and bullets, chemical and biological warfare agents aren't merely limited to the battlefield anymore. In some cases, they are now being used on a new front: major metropolitan cities. And in the *Handbook of Chemical and Biological Warfare Agents*, emergency response personnel from HazMat and Police SWAT teams to Explosive Ordnance Disposal units will find a myriad of information on how to deal with such incidents involving dangerous chemical and biological agents. The 504-page book is formatted into a series of indices developed to facilitate rapid access to key information on chemical, biological, and toxin agents, with each index cross-referenced to all others. The wealth of data not only includes the physical appearance, odor, signs, and symptoms of dangerous materials such as nerve agents and vesicants, but also the detection and removal of such agents and the treatment of victims. Author D. Hank Ellison, a former U.S. Environmental Protection Agency emergency responder and officer in the Chemical Corps, who provides chemical and biological counterterrorism training to HazMat, Police, SWAT, and Explosive Ordnance Disposal teams, also includes a litany of guidelines from such sources as the U.S. Army, DOT, and other agencies. **The Cambridge Handbook of Intelligence** Robert J. Sternberg, Scott Barry Kaufman, 2011-05-30. This volume provides the most comprehensive and up-to-date compendium of theory and research in the field of human intelligence. Each of the 42 chapters is written by world-renowned experts in their respective fields, and collectively they cover the full range of topics of contemporary interest in the study of intelligence. The handbook is divided into nine parts. Part I covers intelligence and its measurement. Part II deals with the development of intelligence. Part III discusses intelligence and group differences. Part IV concerns the biology of intelligence. Part V is about intelligence and information processing. Part VI discusses different kinds of intelligence. Part VII covers intelligence and society. Part VIII concerns intelligence in relation to allied constructs, and Part IX is the concluding chapter, which reflects on where the field is currently and where it still needs to go.
