

MARK SCHEME for the May/June 2013 series

0460 GEOGRAPHY

0460/22

Paper 2, maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

The 1989 FAO Standard Specifications for the Marking and Identification of Fishing Vessels: Use and options for review Davies, S., Hjort, A. and Markides, M., 2022-07-19 The marking of fishing vessels is important for their identification to support the global efforts to promote sustainable fisheries for safety at sea and to combat illegal unreported and unregulated fishing For this reason the FAO Standard Specifications for the Marking and Identification of Fishing Vessels were developed and endorsed by COFI in 1989 as a voluntary instrument providing a standardized system for the identification of fishing vessels operating or likely to operate in waters of another State Global developments have had an impact on the usefulness of the FAO Standard Specifications specifically the increased use of the

International Maritime Organization number as a unique vessel identifier and the establishment of the FAO's Global Record. This document provides background to the development of the FAO Standard Specifications and the results of a study to assess the level of their adoption at the national, regional and international levels. It also describes progress in the areas of vessel identity, vessel tracking, different vessel types and catch traceability and how these impact the usefulness of the FAO Standard Specifications. Finally, the document proposes a review and update of the FAO Standard Specifications.
