Bordini, 2012-07-13 Fast track conference proceedings State of the art research Up to date results **Programming Multi-Agent Systems** Lars Braubach, Jean-Pierre Briot, John Thangarajah, 2010-09-27 The earliest work on agents may be traced at least to the rst conceptualization of the actor model by Carl Hewitt In a paper in an AI conference in the early 1970s Hewitt described actors as entities with knowledge and goals Research on actors continued to focus on AI with the development of the Sprites model in which a monotonically growing knowledge base could be accessed by actors inspired by what Hewitt called the Scientific Computing Metaphor In the late 1970s and well into the 1980s controversy raged in AI between those arguing for declarative languages and those arguing for procedural ones Actor researchers stood on the side of a procedural view of knowledge arguing for an open systems perspective rather than the closed world hypothesis necessary for a logical declarative view In the open systems view agents had armslength relationships and could not be expected to store consistent facts nor could the information in a system be considered complete the negation as failure model Subsequent work on actors including my own focused on using actors for general purpose concurrent and distributed programming In the late 1980s a number of actor languages and frameworks were built These included Act in C by Dennis Kafura and Actalk in Smalltalk by Jean Pierre Briot In recent times the use of the Actor model in various guises has proliferated as new parallel and distributed computing platforms and applications have become common clusters Webservices P2P networks client programming on multicore processors and cloud computing **Programming Multi-Agent Systems** Jean-Pierre Briot, Lars Braubach, John Thangarajah, 2010 This book constitutes the proceedings of the 7th International Workshop on Programming Multi Agent Systems held in Budapest Hungary in May 2009 **Multiagent Systems, second edition** Gerhard Weiss, 2016-10-28 The new edition of an introduction to multiagent systems that captures the state of the art in both theory and practice suitable as textbook or reference Multiagent systems are made up of multiple interacting intelligent agents computational entities to some degree autonomous and able to cooperate compete communicate act flexibly and exercise control over their behavior within the frame of their objectives They are the enabling technology for a wide range of advanced applications relying on distributed and parallel processing of data information and knowledge relevant in domains ranging from industrial manufacturing to e commerce to health care This book offers a state of the art introduction to multiagent systems covering the field in both breadth and depth and treating both theory and practice It is suitable for classroom use or independent study This second edition has been completely revised capturing the tremendous developments in multiagent systems since the first edition appeared in 1999 Sixteen of the book s seventeen chapters were written for this edition all chapters are by leaders in the field with each author contributing to the broad base of knowledge and experience on which the book rests The book covers basic concepts of computational agency from the perspective of both individual agents and agent organizations

communication among agents coordination among agents distributed cognition development and engineering of multiagent systems and background knowledge in logics and game theory Each chapter includes references many illustrations and examples and exercises of varying degrees of difficulty The chapters and the overall book are designed to be self contained and understandable without additional material Supplemental resources are available on the book s Web site Contributors Rafael Bordini Felix Brandt Amit Chopra Vincent Conitzer Virginia Dignum J rgen Dix Ed Durfee Edith Elkind Ulle Endriss Alessandro Farinelli Shaheen Fatima Michael Fisher Nicholas R Jennings Kevin Leyton Brown Evangelos Markakis Lin Padgham Julian Padget Iyad Rahwan Talal Rahwan Alex Rogers Jordi Sabater Mir Yoav Shoham Munindar P Singh Kagan Tumer Karl Tuyls Wiebe van der Hoek Laurent Vercouter Meritxell Vinyals Michael Winikoff Michael Wooldridge Shlomo Zilberstein
