Sovereignty and Land Rights of Indigenous Peoples in the United States Wayne Edwards, 2020-09-01 This book presents a comparative study of the land settlements and sovereign arrangements between the US government and the three major aggregated groups of indigenous peoples: American Indians, Native Alaskans and Native Hawaiians, whose land rights claims have resulted in very different outcomes. It shows that the outcomes of their sovereign claims were different though their bases were similar. While the US government insists that it is committed to the government-tribe relationship, it has with the tribes, federal authority severely limits the ability of tribal governments to participate as an equal partner.

War by Other Means Robert D. Blackwill, Jennifer M. Harris, 2016-04-12 Nations carry out geopolitical combat through economic means. Yet America often reaches for the gun over the purse to advance its interests abroad. Robert Blackwill and Jennifer Harris show that if US policies are left uncorrected, the price in blood and treasure will only grow. Geoeconomic warfare requires a new vision of US statecraft.

Civil War? Interstate War? Hybrid War? Jakob Häuter, 2021-04-20 This volume of collected papers takes stock of what has become known about the war in eastern Ukraine's Donets Basin/Donbas between April 2014 and mid-2020. It provides an introduction to the conflict and illustrates the key point of contention in the academic debate surrounding it: the question whether this war is primarily an internal Ukrainian phenomenon or the result of a covert Russian invasion. The contributions by recognized specialists from Ukraine, Russia, Germany and Japan offer multifaceted views and insights into this long-lasting conflict for both expert readers and those who

are new to the topic The volume s contributors are Tymofii Brik Jakob Hauter Sanshiro Hosaka Yuriy Matsiyevsky Nikolay Mitrokhin Maximilian Kranich and Ulrich Schneckener Practising Cultural Geographies Ravi S. Singh, Bharat Dahiya, Arun K. Singh, Padma C. Poudel, 2022-05-20 This festschrift honours Prof Rana P B Singh who has dedicated his life to teaching and conducting research on cultural geography with a dweller Indian perspective The book focuses on the cultural geographies of India and to an extent that of South Asia It is a rich collection of 23 essays on the themes apprised by him covering landscapes religion heritage pilgrimage and tourism and human settlements *Palestine* Nur Masalha, 2018-08-15 This rich and magisterial work traces Palestine s millennia old heritage uncovering cultures and societies of astounding depth and complexity that stretch back to the very beginnings of recorded history Starting with the earliest references in Egyptian and Assyrian texts Nur Masalha explores how Palestine and its Palestinian identity have evolved over thousands of years from the Bronze Age to the present day Drawing on a rich body of sources and the latest archaeological evidence Masalha shows how Palestine s multicultural past has been distorted and mythologised by Biblical lore and the Israel Palestinian conflict In the process Masalha reveals that the concept of Palestine contrary to accepted belief is not a modern invention or one constructed in opposition to Israel but rooted firmly in ancient past Palestine represents the authoritative account of the country s history *Nature's Fabric* David Lee, 2017-09-28 Leaves are all around us in backyards cascading from window boxes even emerging from small cracks in city sidewalks given the slightest glint of sunlight Perhaps because they are everywhere it s easy to overlook the humble leaf but a close look at them provides one of the most enjoyable ways to connect with the natural world A lush incredibly informative tribute to the leaf *Nature s Fabric* offers an introduction to the science of leaves weaving biology and chemistry with the history of the deep connection we feel with all things growing and green Leaves come in a staggering variety of textures and shapes they can be smooth or rough their edges smooth lobed or with tiny teeth They have adapted to their environments in remarkable often stunningly beautiful ways from the leaves of carnivorous plants which have tiny trigger hairs that signal the trap to close to the impressive defense strategies some leaves have evolved to reduce their consumption Recent studies suggest for example that some plants can detect chewing vibrations and mobilize potent chemical defenses In many cases we ve learned from the extraordinary adaptations of leaves such as the invention of new self cleaning surfaces inspired by the slippery coating found on leaves But we owe much more to leaves and Lee also calls our attention back to the fact that that our very lives and the lives of all on the planet depend on them Not only is foliage is the ultimate source of food for every living thing on land its capacity to cycle carbon dioxide and oxygen can be considered among evolution s most important achievements and one that is critical in mitigating global climate change Taking readers through major topics like these while not losing sight of the small wonders of nature we see every day if you d like to identify a favorite leaf Lee s glossary of leaf characteristics means you won t be left out on a limb *Nature s Fabric* is eminently readable and full of intriguing research sure to enhance your appreciation for these extraordinary green machines
