

CHAPTER 1 - HUMAN GEOGRAPHY-NATURE AND SCOPE

DEFINITIONS OF HUMAN GEOGRAPHY

1. "Human geography is the synthetic study of relationship between human societies and earth's surface". -**Ratzel**
* **Synthesis** has been emphasised
2. "Human geography is the study of "the changing relationship between the unresting man and the unstable earth." -**Ellen C. Semple**
* **Dynamism** has been emphasised
3. "Conception resulting from a more synthetic knowledge of the physical laws governing our earth and of the relations between the living beings which inhabit it". - **Paul Vidal de la Blache**
* **Interrelationship** has been emphasised.

CONCEPTS OF ENVIRONMENTAL DETERMINISM, POSSIBILISM AND NEO DETERMINISM

1. ENVIRONMENTAL DETERMINISM

- * In the early stages, human were greatly adapted to the dictates of Nature because the level of technology was very low.
- * There is direct dependence of human beings on nature for resources which sustained them.
- * The physical environment for such societies became the "Mother Nature".
- * This type of interaction between primitive human society and strong forces of nature was termed as **Environmental determinism**.
- * At that stage of very low technological development, human got naturalised who listened to Nature, was afraid of its fury and worshipped it.

2. POSSIBILISM

- * with the social and cultural development, humans develop better and more efficient technology.
- * **They move from a state of necessity to a state of freedom.**
- * Human creates possibilities with the resources obtained from the environment
- * **Here man is capable to modify his environment by making use of numerous possibilities offered by nature.**
- * Such a man- nature relationship is termed as **Possibilism**.
- * Nature provides opportunities and human being make use of these and slowly nature gets humanised

3. NEO DETERMINISM/STOP AND GO DETERMINISM

- * Developed by **Griffith Taylor**.
- * It is a middle path concept between environmental determinism and possibilism.
- * **As per this concept, neither there is a situation of absolute necessity nor is there a condition of absolute freedom.**
- * It means that possibilities can be created within the limits which do not harm the environment and there is no free run without accidents.
- * **The Neo -Determinism attempts to bring a balance nullifying the "either" "or" dichotomy.**

Geography Focus Stage Chapter Answers

Kasia Papaja

Geography Focus Stage Chapter Answers:

Focus on CLIL Kasia Papaja, 2014-06-02 Content and Language Integrated Learning CLIL refers to an educational context where a foreign language in this case English is used as a medium of instruction in content subjects This book presents and analyses the changes which take place in a CLIL classroom in secondary education This book will also serve to raise CLIL teachers awareness of certain changes which occur in the CLIL classroom and will consequently help them understand the process of Content and Language Integrated Learning The book is organised into two parts theoretical and empirical These parts consist of six chapters each The first three chapters review the professional literature relevant to this study while the other three chapters are devoted to the empirical study

How To Do Your Dissertation in Geography and Related Disciplines Tony Parsons, Peter G Knight, 2015-02-20 This book provides undergraduates with a step by step guide to successfully carrying out an independent research project or dissertation The book addresses each stage of the project by answering the questions that a student is likely to ask as the work progresses from choosing the subject area and planning the data collection through to producing illustrations and writing the final report Most undergraduates in geography and related disciplines are required to undertake individual projects as part of their degree course this book is a source of constructive practical advice This new third edition continues the tradition of friendly well informed but informal support and continues to focus on answering the specific questions that students typically ask at each stage of the project The new edition brings the text completely up to date by taking into account changes within the discipline and changes in the ways that students work New digital media social networking mobile technology e journals anti plagiarism software ethics approval rules and risk assessments are among the issues that this new edition takes into account The new edition also broadens the book s appeal by extending its coverage of the wide range of different approaches to geographical research with expanded coverage of qualitative research Geographic Information Systems and new approaches to research design in both physical and human geographies

Focus on Geography Phillip Bacon, 1970 *Techniques in Human Geography* Jim Lindsay, 2006-05-05 The first concise guide to the purposeful use of techniques in human geography Examining key techniques in detail survey and qualitative numerical spatial and computer based the book draws on important case studies such as the decennial census to illustrate applications The importance of up to date IT based techniques is particularly stressed introducing widely recognised applications A final section explores the Internet which offers exciting new resources but also creates problems for researchers used to traditional academic fields

The Sustainability Curriculum Cedric Cullingford, John Blewitt, 2013 The links between education and sustainable development are deepening although subject to much controversy and debate The success of the sustainability discourse depends both on the pedagogic and research functions of higher education Similarly for higher education itself to remain relevant and engaged it faces pressure not only to integrate the insights and lessons drawn from the perspective of sustainable development but also to be responsive to

scrutiny of its own practices in relation to sustainability Among professionals in higher education sustainable development has its supporters and detractors It is embraced by some individuals and departments while being perceived by others as a threat to the coherence of particular disciplines Although it is not currently an academic discipline in its own right increasing public and professional familiarity with the term and the increasing urgency of global calls for the implementation of sustainable development mean that this is rapidly changing This volume analyses the impact of the concepts and practices of sustainability and sustainable development on various academic disciplines institutional practices fields of study and methods of enquiry The contributors drawn from a wide range of disciplines perspectives educational levels and institutional contexts examine the purpose of the modern university and the nature of sustainable education which includes exploring links to social movements for sustainability projects curriculum change culture and biodiversity values relating to gender equality and global responsibility and case studies on the transformation or otherwise of some specific disciplines
