

PCAPS

Full PCAPS for all his activities. 7GB of PCAP files. Every packet he sent or received was there. Luck was on our side here

We did lots of searches in the PCAPS and extracted and analyzed every select statement he performed and the results

We were able to determine, with a quite a bit of certainty, only about 150 records with SSNs were downloaded or viewed

We were able to see everything he did and every bit of data he received.

- He basically “fumbled around” for a few weeks

- 99% of the select statements – ‘no rows returned’

Split tunnel VPN, traffic for our networks went through the VPN and was captured while general internet traffic did not

- However in the PCAPS we saw all his DNS requests

- Visit some forums and then try other stuff and fail
