

The International Conference on Mathematical Sciences and Technology, MathTech, is a biennial conference organised by the School of Mathematical Sciences, USM. This event is open to all national and international experts, practitioners, researchers, and academics to gather and share their knowledge.

The details of fees for participation in the conference are shown in the following table.

Category	Local (RM)	International (USD)
Presenter	990	260
Observer	600	150

Note: 1 USD = RM4.20

Assignment Requirement

Part 1: Create Invoice

Construct a C++ program to do the following tasks:

- Enter the participant's name, category, nationality, accommodation (Yes/No).
- If the answer for the question on accommodation is Yes, the program will ask for the number of days. Then the program will call function `calcAccommodation()` to calculate the accommodation charges.
`calcAccommodation()` receives accommodation (Yes/No), number of days and participation type (local/international) as parameters and return the accommodation charge to the main program. The price per night per person is RM150 for local participant, and USD 100 for international participant.
- Call the `calcFee()` function which receives participant category and type as parameters, calculate the fees, and return it via reference parameter.
- Calculate the total fees and accommodation charges and store the result to variable `totalCharge`.
- Call function `printInvoice()` to print the invoice.

Proceed to Part 2 only if you have completed Part 1.

Part 2: Create Invoice via File Processing

- Modify the program in Part 1 to read in the file provided, `File.txt`.
- Use array structure in your program.
- Print all 5 receipts continuously to `Output.txt`.
