Mathlit Department Paper On 2014 In March:

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02
South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience. Mathematical Combinatorics, vol. I, 2015 Linfan Mao, Papers on Antidegree Equitable Sets in a Graph One Modulo N Gracefulness of Some Arbitrary Supersubdivision and Removal Graphs A New Approach to Natural Lift Curves of the Spherical Indicatrices of Timelike Bertrand Mate On Signed Graphs Whose Two Path Signed Graphs are Switching Equivalent to Their Jump Signed Graphs and other topics Contributors C Adiga K N S Krishna Mathew Varkey T K Sunoj B S V Ramachandran C Sekar W Barbara P Sugirtha R Vasuki J Venkateswari Yizhi Chen Siyan Li Wei Chen and others International Journal of Mathematical Combinatorics, Volume 1, 2015 Linfan Mao, The International J Mathematical Combinatorics is a fully refereed international journal sponsored by the MADIS of Chinese Academy of Sciences and published in USA quarterly which publishes original research papers and survey articles in all aspects of mathematical combinatorics Smarandache multi spaces Smarandache geometries non Euclidean geometry topology and their applications to other sciences *Bringing the Common Core Math Standards to Life* Yvelyne Germain-McCarthy, Ivan Gill, 2014-11-20 As high school math teachers shift to the Common Core State Standards the question remains What do the standards actually look like in the classroom This book answers that question by taking you inside of real Common Core classrooms across the country You ll see how exemplary teachers are meeting the new requirements and engaging students in math Through these detailed examples of effective instruction you will uncover how to bring the standards to life in your own classroom Special Features A clear explanation of the big shifts happening in the classroom as a result of the Common Core State Standards Real examples of how exemplary teachers are using engaging strategies and tasks to teach algebra geometry trigonometry statistics mathematics across the curriculum and more A detailed analysis of each example to help you understand why it is effective and how you can try it with your own students Practical ready to use tools you can take back to your classroom including unit plans and classroom handouts

Early Engineering Learning Lyn English,Tamara Moore,2018-05-29 This book addresses engineering learning in early childhood spanning ages 3 to 8 years It explores why engineering experiences are important in young children s overall development and how engineering is a core component of early STEM learning including how engineering education links and supports children s existing experiences in science mathematics and design and technology both before school and in the early school years Promoting STEM education across the school years is a key goal of many nations with the realization that building STEM skills required by societies takes time and needs to begin as early as possible Despite calls from national and international organisations the inclusion of engineering based learning within elementary and primary school programs remains limited in many countries Engineering experiences for young children in the pre school or early school years has received almost no attention even though young children can be considered natural engineers This book addresses this void by exposing what we know about engineering for young learners including their capabilities for solving engineering based problems and the few existing programs that are capitalising on their potential

Our Social World Jeanne H. Ballantine,Keith A. Roberts,Kathleen Odell Korgen,2016-11-30 Inspire your students to develop their sociological imaginations in *Our Social World* Focused on deep learning rather than memorization this book encourages readers to analyze evaluate and apply information about the social world to see the connection between the world and personal events from a new perspective and to confront sociological issues on a day to day basis Organized around the Social World Model a conceptual framework used across chapters to see the complex links between various micro to macro levels of the social system students will develop the practice of using three levels of analysis and to view sociology as an integrated whole rather than a set of discrete subjects
