, 2013-12 *Education Policy in Britain* Clyde Chitty, 2014-03-31 This text provides a clear overview and assessment of the educational policy systems at work in the UK Accessibly written and covering pre school and Higher Education policy making as well as Primary and Secondary the author examines the evolution of education policy from the Education Act of 44 to the academies of today *An Asset-Based Approach to Latino Education in the United States* Eugene E. Garcia, Mehmet Ozturk, 2017-12-15 Challenging perspectives that often characterize Latinos as at risk this book takes an asset approach

highlighting the favorable linguistic cognitive education and cultural assets Latino children bring to educational settings An Asset Based Approach to Latino Education in the United States addresses the increasingly important challenge and opportunity of educating the linguistic and cultural diversity of the growing population of Latino students The book confronts the educational debate regarding effective instructional practices for Latinos bilingual education immigration and assimilation Students of Color and the Achievement Gap Richard R. Valencia, 2015-03-05 Students of Color and the Achievement Gap is a comprehensive landmark analysis of an incontrovertible racialized reality in U S K 12 public education the relentless achievement gap between low socioeconomic students of color and their economically advantaged White counterparts Award winning author and scholar Richard Valencia provides an authoritative and systemic treatment of the achievement gap focusing on Black and Latino Latina students He examines the societal and educational factors that help to create and maintain the achievement gap by drawing from critical race theory an asset based perspective and a systemic inequality approach By showing how racialized opportunity structures in society and schools ultimately result in racialized patterns of academic achievement in schools Valencia shows how the various indicators of the achievement gap are actually symptoms of the societal and school quality gaps Following each of these concerns Valencia provides a number of reform suggestions that can lead to systemic transformations of K 12 education Students of Color and the Achievement Gap makes a persuasive and well documented case that school success for students of color and the empowerment of their parents can only be fully understood and realized when contextualized within broader political economic and cultural frameworks

Math Education for America? Mark Wolfmeyer, 2013-12-04 Math Education for America analyzes math education policy through the social network of individuals and private and public organizations that influence it in the United States The effort to standardize a national mathematics curriculum for public schools in the U S culminated in 2010 when over 40 states adopted the Common Core State Standards for Mathematics Rather than looking at the text of specific policy documents this book complements existing critical reviews of the national math education curriculum by employing a unique social network analysis Breaking new ground in detailing and theorizing the politics of math education Wolfmeyer argues that the private interests of this network are closely tied to a web of interrelated developments human capital education policy debates over traditional and reform pedagogy the assumed content knowledge deficit of math teachers and the proliferation of profit driven educational businesses By establishing the interconnectedness of these interests with the national math education curriculum he shows how the purported goals of math education reform are aligned with the prevailing political agendas of this social network rather than the national interest **Academia Next** Bryan Alexander, 2020-01-14 From the renowned futurist a look at how current trends will transform American higher education over the next twenty years 2020 Most Significant Futures Work Award Winner Association of Professional Futurists The outlook for the future of colleges and universities is uncertain Financial stresses changing student populations and rapidly

developing technologies all pose significant challenges to the nation's colleges and universities. In *Academia Next*, futurist and higher education expert Bryan Alexander addresses these evolving trends to better understand higher education's next generation. Alexander first examines current economic, demographic, political, international, and policy developments as they relate to higher education. He also explores internal transformations within postsecondary institutions, including those related to enrollment, access, academic labor, alternative certification, sexual assault, and the changing library, paying particularly close attention to technological changes. Alexander then looks beyond these trends to offer a series of distinct scenarios and practical responses for institutions to consider when combating shrinking enrollments, reduced public support, and the proliferation of technological options. Arguing that the forces he highlights are not speculative but are already in play, Alexander draws on a rich, extensive, and socially engaged body of research to best determine their likeliest outcomes. It is only by taking these trends seriously, he writes, that colleges and universities can improve their chances of survival and growth. An unusually multifaceted approach to American higher education that views institutions as complex organisms, *Academia Next* offers a fresh perspective on the emerging colleges and universities of today and tomorrow.

The Role of Letter-Speech Sound Integration in Typical and Atypical Reading Development Jurgen Tijms, Silvia Brem, Gorka Fraga González, Iliana I. Karipidis, 2020-07-24. Fluency is the quintessence of effective reading. To obtain socio-economic success, fluent reading is of primordial importance, and reading is considered a crucial marker of an individual's life course. Approximately 5% of children are affected by developmental dyslexia, exhibiting inaccurate word recognition, spelling, phonological decoding, and most importantly, severely dysfluent reading, which remains as their most characterizing and persistent deficit. Unable to attain society's literacy demands, individuals with dyslexia are at severe risk for adverse academic, economic, and psychosocial consequences. Recently, it has been posed that the development of automatic letter-speech sound (LSS) integration is critical in the acquisition of fluent reading skills, and in particular, that a failure to develop automatic LSS integration results in an impairment of reading fluency. In support, neurocognitive research has suggested that the development of automatized processing of LSS associations is an essential step in the formation of a functional neural network for reading. Furthermore, both neurocognitive and behavioural studies have suggested a less efficient LSS integration in children with dyslexia than in typical readers. Finally, results from intervention studies have suggested that training LSS might be a promising approach to ameliorate dysfluent reading in children with dyslexia. Nonetheless, there is still a considerable gap of knowledge in our understanding of the mechanisms by which learning LSS associations relate to dysfluent reading.

Interdisciplinary Teaching About Earth and the Environment for a Sustainable Future David C. Gosselin, Anne E. Egger, J. John Taber, 2018-12-13. *Interdisciplinary Teaching about the Earth and Environment for a Sustainable Future* presents the outcomes of the InTeGrate project, a community effort funded by the National Science Foundation to improve Earth literacy and build a workforce prepared to tackle environmental and resource issues. An Age of Accountability John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree
