**Illuminating and Advancing the Path for Mathematical Writing Research** Colonnese, Madelyn W., Casa, Tutita M., Cardetti, Fabiana, 2023-11-20

Mathematical writing is essential for students' math learning but it's often underutilized due to unclear guidelines. Mathematical writing is a mode of communication that provides teachers access to their students' thinking and importantly offers students an opportunity to deepen their mathematical understanding, engage in mathematical reasoning and learn a fundamental way to communicate mathematically. Notably, one needs to be able to judiciously combine mathematical symbols, representations and text. However, more research is needed to exemplify the qualities of mathematical writing, develop implementation methods and support teachers.

**Illuminating and Advancing the Path for Mathematical Writing Research** is a necessary, comprehensive resource designed to enhance mathematical writing and promote equitable learning. This research book provides a comprehensive understanding of the current state of mathematical writing and illuminates various perspectives on moving the teaching and learning of K-12 mathematical writing forward. Mathematical writing is an important yet underutilized component of mathematical discourse and this book offers further insight into understanding what it means to write mathematically for mathematics educators and researchers. It informs with research-based implementation strategies and creates purposeful professional learning opportunities. Ultimately, K-12 students will benefit from a more informed field because they will have access to a vital mode of mathematical reasoning and communication.

**Learning Disorders** Peter Westwood, 2017-07-14

What are learning disorders? How can schools endeavour to address these disorders in today's inclusive classrooms? This book answers these important questions in practical terms and discusses in detail the instructional needs of students with dyslexia, dysgraphia, dyscalculia, dyspraxia and other significant disorders that affect learning. Peter Westwood draws on international research literature to provide supporting evidence of best practices. The book is unique in linking the teaching methods recommended for overcoming

learning problems directly to each of the three tiers of support in the Response to Intervention Model. It presents examples of effective whole class teaching, intensive small group instruction, and individual tutoring, as well as addressing key topics such as educational progress of students with learning disorders, principles for teaching dyslexic students, difficulties with writing and spelling, developing students' numeracy skills, specific intervention strategies, nonverbal learning disabilities. Learning Disorders will be of interest to practising teachers, trainee teachers, teaching assistants, educational psychologists, school counsellors, and parents. It will also provide valuable insights for any school planning to upgrade its support system for students with special educational needs.

*Policies and Practices for Sustainability Transformation in Higher Education Institutions* Vasiliki Kioupi, Rosario Michel-Villarreal, Felister Nzuve, Naoya Abe, George Giannopoulos, 2025-08-07. Calls for transforming higher education toward sustainability by academics are not new. Recently, students both current and prospective have actively voiced their demands for this change. They seek an education that equips them to navigate the complexities of sustainability and climate change, fostering knowledge and skills for action. In response, higher education institutions (HEIs) are formulating strategies to align their mission with sustainability goals. However, the effectiveness of these strategies, along with the underlying policies and practices, remains insufficiently studied. To address this gap, it is crucial to convene academics, professional staff, and students for discussions on necessary cultural shifts, a roadmap, and ways to monitor and evaluate this change. Such dialogues will lead to improved decision making for transformation to achieve sustainability. Students will not only learn about sustainability in their courses but also apply them to their lives within and beyond universities that champion holistic sustainability transformation.
