Law and Popular Culture Michael Asimow, Kathryn Brown, David Papke, 2014-06-12 Commentators have noted the extraordinary impact of popular culture on legal practice courtroom proceedings police departments and government as a whole and it is no exaggeration to say that most people derive their basic understanding of law from cultural products Movies television programs fiction children's literature online games and the mass media typically influence attitudes and impressions regarding law and legal institutions more than law and legal institutions themselves *Law and Popular Culture International Perspectives* enhances the appreciation of the interaction between popular culture and law by underscoring this interaction's multinational and international features Two dozen authors from nine countries invite readers to consider the role of law related popular culture in a broad range of nations socio political contexts and educational environments Even more importantly selected contributors explore the global transmission and reception of law related cultural products and in particular the influence of assorted works and media across national borders and cultural boundaries The circulation and consumption of law related popular culture are increasing as channels of mass media become more complex and as globalization runs its uncertain course *Law and Popular Culture International Perspectives* adds to the critical understanding of the worldwide interaction of popular culture and law and encourages reflection on the wider implications of this mutual influence across both time and geography

The Armed Forces Covenant in action? Great Britain: Parliament: House of Commons: Defence Committee, 2013-07-18 A series of Ofsted inspections on Army Apprenticeships conducted in 2013 rated the overall effectiveness as good This was an improvement over the last inspection in 2009 rated as satisfactory now called requires improvement Some 28 per cent of Army recruits were less than 18 years of age Further information is needed on why the Army is so dependent on recruiting personnel under the age of 18 years compared to the other two Services and whether steps are being taken to reduce this dependency Of those recruited in 2012 35 per cent of the Army were rated at entry level 2 for literacy that of a 7 to 8 year old and 39 per cent had a literacy level of an eleven year old If as the MoD states it has to recruit personnel at whatever level of attainment is available then it should boost remedial action when recruitment entry standards are particularly low In light of changes brought about by Future Force 2020 it may be that recruiting personnel with higher levels of attainment would better meet the future needs of the Armed Forces Whilst the Committee recognises that some recruits may not be eager to take further academic exams the MoD should encourage more recruits to undertake English and Maths GCSEs which would stand them in good stead for future employment The MoD has carried out some useful pilot projects with paramedic training and should identify more potential projects to ensure that vital skills paid for by the MoD are not lost to the country

Respect for Teachers Brian Ford, 2012-12-27 For over 30 years we have been in the midst of a paradox Following a questionable logic that sees education as a means to economic ends efforts to reform

education have focused on keeping the US from slipping in international economic competition Relying on testing as a standard in the end we may have decreased our human potential and become less competitive Our system has gotten worse at its core in its philosophical tenets and in its ultimate effects by placing unwonted pressure on our youth and in stifling their creativity While this goes back decades Respect for Teachers takes its title from a phrase perhaps a codeword in President s 2011 State of the Union address and sits down to consider its implications Connecting attacks on teachers unions and schools and the misrepresentation of research to the promotion of new economic models in education it suggests that the Obama administration may be without quite realizing it setting the stage for rapid privatization of the public system As this endangers the egalitarian basis of democracy it also reminds us that schooling is big business many trillions of dollars world wide Joseph Schumpeter once said No bourgeoisie ever disliked war profits Respect operates under the premise that no bourgeoisie ever disliked the spoils of school reform either
