Perhaps the greatest impact has been felt by the education community. Today it is nearly impossible to find a college or university that has not introduced Technical professionals have greatly benefited from new tools and techniques that have allowed some form of mathematical computation into the curriculum. Students now have regular access to the amount of computational power that were available to a very exclusive set of researchers five years ago. This Maple V and the new generation of mathematical computation systems have the potential of challenges and opportunities having the same kind of revolutionary impact as high level general purpose programming. Comparisons to the calculator revolution of the languages e.g. FORTRAN BASIC C 70 s are inescapable. Calculators have application software e.g. spreadsheets extended the average person's ability to solve problems more efficiently and calculators have had Maple V has amplified our arguably in better ways. Today one needs mathematical abilities we can solve more problems more accurately and more often. In life budgets mortgages gas mileage etc specific disciplines this amplification has taken. For business people or professionals the excitingly different forms.
