Biology B. S. Beckett, 1986 An established and successful textbook which provides a thorough and comprehensive basis for GCSE syllabuses The social

environmental and technological aspects of biology are discussed throughout the book and students are encouraged to explore topics in depth through investigational and experimental work Simply worded text with clear explanations of important technical terms Superb structural drawings and easy to copy diagrams which show students how to reduce complex information to a simple form Questions at the end of each chapter designed to reinforce understanding *Toward a Unified Theory of Problem Solving* Mike U. Smith, 2012-11-12 One of the most active fields of educational research in recent years has been the investigation of problem solving performance Two opposing views of current research one suggesting that there are more differences than similarities within different domains and the other stating that there is great similarity lead to a variety of questions Is problem solving a single construct Are there aspects of problem solving performance that are similar across a variety of content domains What problem solving skills learned within one context can be expected to transfer to other domains The purpose of this book is to serve as the basis for the productive exchange of information that will help to answer these questions by drawing together preliminary theoretical understandings sparking debate and disagreement raising new questions and directions and perhaps developing new world views Multiple Representations in Biological Education David F. Treagust, Chi-Yan Tsui, 2013-02-01 This new publication in the Models and Modeling in Science Education series synthesizes a wealth of international research on using multiple representations in biology education and aims for a coherent framework in using them to improve higher order learning Addressing a major gap in the literature the volume proposes a theoretical model for advancing biology educators notions of how multiple external representations MERs such as analogies metaphors and visualizations can best be harnessed for improving teaching and learning in biology at all pedagogical levels The content tackles the conceptual and linguistic difficulties of learning biology at each level macro micro sub micro and symbolic illustrating how MERs can be used in teaching across these levels and in various combinations as well as in differing contexts and topic areas The strategies outlined will help students reasoning and problem solving skills enhance their ability to construct mental models and internal representations and ultimately will assist in increasing public understanding of biology related issues a key goal in today s world of pressing concerns over societal problems about food environment energy and health The book concludes by highlighting important aspects of research in biological education in the post genomic information age **The Effective Teaching of Biology** Chris R. Brown, 2014-05-12 The Effective Teaching of Biology aims to identify the special dimensions of the subject how it contributes to the curriculum as a whole and why the teaching of biology differs from the teaching of other subjects Current legal and safety requirements are provided together with practical teaching ideas and sources of information The book also covers contemporary issues which are the subject of extensive debate such as the changing patterns of assessment of pupils the use of living organisms in school and the nature of learning difficulties which pupils experience Assessing Science Understanding Joel J. Mintzes, James H. Wandersee, Joseph D. Novak, 2005-08-22 Recent government publications like Benchmarks for Scientific Literacy and Science

for all Americans have given teachers a mandate for improving science education in America What we know about how learners construct meaning particularly in the natural sciences has undergone a virtual revolution in the past 25 years Teachers as well as researchers are now grappling with how to better teach science as well as how to assess whether students are learning *Assessing Science Understanding* is a companion volume to *Teaching Science for Understanding* and explores how to assess whether learning has taken place The book discusses a range of promising new and practical tools for assessment including concept maps vee diagrams clinical interviews problem sets performance based assessments computer based methods visual and observational testing portfolios explanatory models and national examinations

Multiculturalism and Learning Style Rita Dunn, Shirley A. Griggs, 1998-08-20 This text synthesizes the research on the learning style characteristics of five culturally diverse groups Native Americans Hispanic Americans African Americans Asian Americans and European Americans Although each of these groups has distinguishing features and differs from other groups on some of the 22 elements that constitute learning style there are broad within group variations that preclude generalizations Dunn and Griggs identify a multidimensional model of learning style describe a comprehensive assessment instrument for identifying an individual's learning style and provide a variety of educational interventions that accommodate diverse learning style preferences
