**A Remarkable Collection of Babylonian Mathematical Texts** Jöran Friberg, 2007-07-31 The book analyzes the mathematical tablets from the private collection of Martin Schoyen It includes analyses of tablets which have never been studied before This provides new insight into Babylonian understanding of sophisticated mathematical objects The book is carefully written and organized The tablets are classified according to mathematical content and purpose while drawings and

pictures are provided for the most interesting tablets      *Strayer-Upton Arithmetics* George Drayton Strayer, Clifford Brewster Upton, 1928      **Mental Differences in Certain Immigrant Groups** Chester Arthur Gregory, Earl Leroy Packard, Edmund S. Conklin, G. Dallas Hanna, Giles Murrell Ruch, Kimball Young, Raymond Holder Wheeler, Warren DuPré Smith, Thomas Darl Cutsforth, 1922      *New Mathematical Cuneiform Texts* Jöran Friberg, Farouk N.H. Al-Rawi, 2017-02-13

This monograph presents in great detail a large number of both unpublished and previously published Babylonian mathematical texts in the cuneiform script. It is a continuation of the work *A Remarkable Collection of Babylonian Mathematical Texts* Springer 2007 written by Jöran Friberg, the leading expert on Babylonian mathematics. Focussing on the big picture, Friberg explores in this book several Late Babylonian arithmetical and metro-mathematical table texts from the sites of Babylon, Uruk, and Sippar; collections of mathematical exercises from four Old Babylonian sites; as well as a new text from Early Dynastic Early Sargonic Umma, which is the oldest known collection of mathematical exercises. A table of reciprocals from the end of the third millennium BC, differing radically from well-documented but younger tables of reciprocals from the Neo-Sumerian and Old Babylonian periods, as well as a fragment of a Neo-Sumerian clay tablet showing a new type of a labyrinth, are also discussed. The material is presented in the form of photos, hand-copies, transliterations, and translations, accompanied by exhaustive explanations. The previously unpublished mathematical cuneiform texts presented in this book were discovered by Farouk Al-Rawi, who also made numerous beautiful hand-copies of most of the clay tablets.

Historians of mathematics and the Mesopotamian civilization, linguists, and those interested in ancient labyrinths will find *New Mathematical Cuneiform Texts* particularly valuable. The book contains many texts of previously unknown types and material that is not available elsewhere.
