

I'm no stranger to contrast. A Chinese American with accented Chinese, a Florida-born Texan, a first-generation American with a British passport: no label fits me without a caveat. But I've always strived to find connections among the dissimilar. In my home across the sea, although my relatives' rapid Mandarin sails over my head, in them I recognize the same work ethic that carried my parents out of rural Shanghai to America, that fueled me through sweltering marching band practices and over caffeinated late nights. I even spend my free time doing nonograms, grid-based logic puzzles solved by using clues to fill in seemingly random pixels to create a picture.

It started when I was a kid. One day, my dad captured my fickle kindergartner attention (a herculean feat) and taught me Sudoku. As he explained the rules, those mysterious scaffoldings of numbers I often saw on his computer screen transformed into complex structures of logic built by careful strategy.

From then on, I wondered if I could uncover the hidden order behind other things in my life. In elementary school, I began to recognize patterns in the world around me: thin, dark clouds signaled rain, the moon changed shape every week, and the best snacks were the first to go. I wanted to know what unseen rules affected these things and how they worked. My parents, both pipeline engineers, encouraged this inquisitiveness and sometimes tried explaining to me how they solved puzzles in their own work. Although I didn't understand the particulars, their analytical mindsets helped me muddle through math homework and optimize matches in Candy Crush.

In high school, I studied by linking concepts across subjects as if my coursework was another puzzle to solve. PEMDAS helped me understand appositive phrases, and the catalysts for revolutions resembled chemical isotopes, nominally different with the same properties. As I grew older, my interests expanded to include the delicate systems of biology, the complexity of animation, and the nuances of language. Despite these subjects' apparent dissimilarity, each provided fresh, fascinating perspectives on the world with approaches like color theory and evolution. I was (and remain) voracious for the new and unusual, spending hours entrenched in Wikipedia articles on obscure topics, i.e. classical ciphers or dragons, and analyzing absurdist YouTube videos.

Unsurprisingly, like pilot fish to their sharks, my career aspirations followed my varied passions: one day I wanted to be an illustrator, the next a biochemist, then a stand-up comedian. When it came to narrowing down the choices, narrowing down myself, I felt like nothing would satisfy my ever-fluctuating intellectual appetite.

But when I discovered programming, something seemed to settle. In computer science, I had found a field where I could be creative, explore a different type of language, and (yes) solve puzzles. Coding let me both analyze logic in its purest form and manipulate it to accomplish anything from a simple "print 'hello world'" to creating functional games. Even when lines of red error messages fill my console, debugging offered me the same thrill as a particularly good puzzle. Now, when I see my buggy versions of Snake, Paint, and Pacman in my files, I'm filled paradoxically with both satisfaction and a restless itch to improve the code and write new, better programs.

While to others my life may seem like a jumble of incompatible fragments, like a jigsaw puzzle, each piece connects to become something more. However, there are still missing pieces at the periphery: experiences to have, knowledge to gain, bad jokes to tell. Someday I hope to solve the unsolvable. But for now, I've got a nonogram with my name on it.

**The Mighty Head** Udit Mishra ,2022-10-12 *The Mighty Head* by Udit Mishra is solely based on a teenager's life who had a lot of challenges and obstacles thrown her way while she confronted baldness at the age of 11. This book helps shatter all the stigmas that are present in the society and which give people a hard time in order to confront their true identity. The society is a place where people are expected to act a certain way and look a certain way if not then they are never accepted as a whole. While Udit writes this book she deals with all the issues that she faced growing up and explains to people how it's ok to be ok in your own skin and how it is not a requirement to perceive yourself based on what others think you should look like or act like. She also talks a lot about Alopecia as a disease and how people who are friends with someone who has a disease which is visible should talk to not make it awkward or uncomfortable for the other person. The name *The Mighty Head* originated from Udit Mishra's Ted talk where she for the first time felt confident in talking about her Alopecia and this title means a lot to her as being a bald girl has been difficult and knowing that stepping foot outside the house and having people stare at you or even ask you questions about your disease is scary because even when you don't try to draw any attention to yourself you still end up doing that because you are a girl and you are bald. Therefore *Mighty Head* signifies how I have felt with a lot of unwanted attention and turned it into something positive.

*Imagine Us Happy* Jennifer Yu,2018-10-23 Some love stories aren't meant to last. Stella lives with depression and her goals for junior year are pretty much limited to surviving her classes staying out of her parents' constant fights and staving off unwanted feelings enough to hang out with her friends Lin and Katie. Until Kevin, a quiet wry senior who understands Stella and the lows she's going through like no one else. With him she feels less lonely listened to and hopeful for the first time since ever. But to keep that feeling Stella lets her grades go and her friendships slide. And soon she sees just how deep Kevin's own scars go. Now little arguments are shattering. Major fights are catastrophic. And trying to hold it all together is exhausting. Stella past the breaking point. With her life spinning out of control she's got to figure out what she truly needs what's worth saving and what to let go.
