McFarland, 2020-05-07 The history of testing mental abilities has seen the dominance of two contrasting approaches psychometrics and neuropsychology These two traditions have different theories and methodologies but overlap considerably in the tests they use Historically psychometrics has emphasized the primacy of a general factor while neuropsychology has emphasized specific abilities that are dissociable This issue about the nature of human mental abilities is important for many practical concerns Questions such as gender ethnic and age related differences in mental abilities are relatively easy to address if they are due to a single dominant trait Presumably such a trait can be measured with any collection of complex cognitive tests If there are many specific mental abilities these would be much harder to measure and associated social issues would be more difficult to resolve The relative importance of general and specific abilities also has implications for educational practices This book includes the diverse opinions of experts from several fields including psychometrics neuropsychology speech language and hearing and applied psychology Reading at University Jamie Q Roberts, Caitlin Hamilton, 2020-02-22 This concise and practical text will equip students with the effective reading strategies they need when preparing for their university assessments It dispels assumptions often made about the nature of reading at university and provides an overview of the culture of academic reading note making and what markers expect This text provides support for reading structured around the process of crafting an assignment including reading critically and developing an academic voice **Artificial General Intelligence** Jordi Bieger, Ben Goertzel, Alexey Potapov, 2015-07-14 This book constitutes the refereed proceedings of the 8th International Conference on Artificial General Intelligence AGI 2015 held in Berlin Germany in July 2015 The 41 papers were carefully reviewed and selected from 72 submissions The AGI conference series has played and continues to play a significant role in this resurgence of research on artificial intelligence in the deeper original sense of the term of artificial intelligence The conferences encourage interdisciplinary research based on different understandings of intelligence and exploring different approaches AGI research differs from the ordinary AI research by stressing on the versatility and wholeness of intelligence and by carrying out the engineering practice according to an outline of a system comparable to the human mind in a certain sense
