

Genetics Practice Problems: Pedigree Tables

Remember the following when working pedigree tables:

- 1) Circles are females and squares are males.
- 2) A shaded circle or square indicates that a person has the trait.

The pedigree chart below is the inheritance of color blindness. Shaded individuals are colorblind. First, determine the probable genotype of person 1-15. Then answer the questions below the table.

What do you know about the genotype of the mother of 1-1?

These parents (1-1 and 1-2) had a color blind son (1-2). His dad has no recessive, but color blind allele. From his mother, since the mother is not shaded, she must be a carrier.

Number 1-4 is color blind, just like his father. Where could he get his allele for color blindness?

Yes, he inherited his allele for color blindness from his mother. Must have been that 1-3 is a carrier. From their father.

Number numbers 1-5 and 1-6 were color blind. How did they have a color blind son (1-8)?

That mother must be a carrier for color blindness.

What must be the genotype of the parents of a color blind daughter? Explain.

To have a color blind daughter, she must have the recessive allele on both of her parents. Her father must be XY and mother must have to be XX.

If mother 1-1 has a normal son, what is the probability that their son will be color blind?

$XX \times XY$ or XY — all of their sons will have color blind.

Birth of Modern Facts James W. Cortada, 2023-01-09 For over twenty years James W Cortada has pioneered research into how information shapes society In this book he tells the story of how information evolved since the mid nineteenth century Cortada argues that information increased in quantity became more specialized by discipline e g mathematics science political science and more organized Information increased in volume due to a series of innovations such as the electrification of communications and the development of computers but also due to the organization of facts and knowledge by discipline making it easier to manage and access He looks at what major disciplines have done to shape the nature of modern information devoting chapters to the most obvious ones Cortada argues that understanding how some features of information evolved is useful for those who work in subjects that deal with their very construct and application such as computer scientists and those exploring social media and most recently history The Birth of Modern Facts builds on Cortada's prior books examining how information became a central feature of modern society most notably as a sequel to All the Facts A History of Information in the United States since 1870 OUP 2016 and Building Blocks of Society History Information Ecosystems and Infrastructures R L 2021

Motulsky,2013-04-17 The first two editions of this book published in 1979 and in 1986 were well received by the scientific community Translations into Italian Japanese and Russian suggest that this book was regarded useful in many parts of the world Meanwhile human genetics has seen dramatic developments and the molecular revolution has attracted thousands of scientists including many molecular biologists to this field About 3700 human genes have already been mapped to chromosomal sites Many such genes have been cloned and the various mutations causing disease have been identified Novel mutational mechanisms such as expanded trinucleotide repeats have been discovered in conditions such as Huntington's disease and the fragile X syndrome of mental retardation Gene action now can often be elucidated by studying the pathway from gene to phenotype following positional cloning rather than working in the opposite direction as was customarily done before the tools of new genetics were available In an increasing number of genetic diseases the pathogenic mechanisms have been elucidated with positive consequences for prevention and treatment It therefore became necessary to rewrite almost completely major portions of this book These developments are now making genetics arguably the leading basic science for medicine as well as a recognized medical speciality But all these changes do not mean that the entire framework of human genetics had to be reconstructed NSTA Pathways to the Science Standards Juliana Texley,Ann L. Wild,2004 Our top selling practical guide still demonstrates how you can bring to life the vision of the Standards for teaching professional development assessment content programs and school systems Throughout the book you ll learn ways to form productive partnerships for reform inside and outside your building with other education stakeholders *Proceedings of the 6th World Congress on Genetics Applied to Livestock Production, January 11-16, 1998* ,1998
