Large Deviations and Asymptotic Methods in Finance Peter K. Friz, Jim Gatheral, Archil Gulisashvili, Antoine Jacquier, Josef Teichmann, 2015-06-16 Topics covered in this volume large deviations differential geometry asymptotic expansions central limit theorems give a full picture of the current advances in the application of asymptotic methods in mathematical finance and thereby provide rigorous solutions to important mathematical and financial issues such as implied volatility asymptotics local volatility extrapolation systemic risk and volatility estimation This volume gathers together ground breaking results in this field by some of its leading experts Over the past decade asymptotic methods have played an increasingly important role in the study of the behaviour of financial models These methods provide a useful alternative to numerical methods in settings where the latter may lose accuracy in extremes such as small and large

strikes and small maturities and lead to a clearer understanding of the behaviour of models and of the influence of parameters on this behaviour Graduate students researchers and practitioners will find this book very useful and the diversity of topics will appeal to people from mathematical finance probability theory and differential geometry **Mexican Mathematicians in the World** Fernando Galaz-García, Cecilia González-Tokman, Juan Carlos Pardo Millán, 2021-11-22 Articles in this volume are based on presentations given at the IV Meeting of Mexican Mathematicians Abroad IV Reunión de Matemáticos Mexicanos en el Mundo held from June 10-15 2018 at Casa Matemática Oaxaca CMO Mexico This meeting was the fourth in a series of ongoing biannual meetings bringing together Mexican mathematicians working abroad with their peers in Mexico This book features surveys and research articles from five broad research areas algebra analysis combinatorics geometry and topology Their topics range from general relativity and mathematical physics to interactions between logic and ergodic theory Several articles provide a panoramic view of the fields and problems on which the authors are currently working on showcasing diverse research lines complementary to those currently pursued in Mexico The research oriented manuscripts provide either alternative approaches to well known problems or new advances in active research fields **Handbook of Research on Developing Circular, Digital, and Green Economies in Asia** Ordóñez de Pablos, Patricia, 2021-07-09 The COVID 19 pandemic has caused extraordinary disruptions in societies companies and nations across the globe In response to this global devastation companies need to develop business and management practices to answer new and emerging challenges and speed the recovery of economies the creation of new jobs and prosperity and achieve sustainable growth The transition to digital and greener economies offers important challenges and opportunities for people companies cities and governments The Handbook of Research on Developing Circular Digital and Green Economies in Asia explores new and emerging business and management practices to support companies and economies in the digital transformation in Asia with special emphasis on success and failure experiences This book will analyze the role of digital skills and competences green issues and technological disruptors in these emerging practices in Asia and how they can contribute to the creation of new business opportunities more jobs and growth for the recovery of Asian economies after the pandemic Covering topics including consumption values psychological capital and tourist culture this book is essential for academicians economists managers students politicians policymakers corporate heads of firms senior general managers managing directors information technology directors and managers libraries and researchers *Analytic Trigonometry* William J.
