Current Trends and Future Developments on (Bio-) Membranes Angelo Basile, Evangelos P. Favvas, 2023-11-21 Modern Approaches in Membrane Technology for Gas Separation and Water Treatment presents condensed information on novel and promising membrane materials The book answers some major questions from the membrane community about three promising materials that are to be introduced at industrial scale It introduces recent out of the box ideas concerning the application of new methods capable to enhance the membrane separation efficiency Sections cover potential commercialization important question on three famous membrane materials and new approaches in membrane technology Finally the book describes and discusses three novel ideas about the potential effect of the magnetic field on membrane separation efficiency the use of cryogenic technology on membrane separations and the use of nanobubble technology on water membrane processes Focuses on the necessity for environmental friendly and cost effective purification and separation process Lists all new membrane materials suitable for commercialization Presents new modern approaches and ideas for improving the membrane efficiency **Government-wide Index to Federal Research & Development Reports** ,1967

NASA Tech Briefs ,1983 **Advanced Computational Approaches for Water Treatment** Krupal M Gangawane, Madhuresh Dwivedi, Praveen Ghodke, 2023-10-06 A rapid growth in global industrialization and population has triggered intense environmental pollution that has led to a water crisis resulting in the decay in the quality of human life and economic losses Novel water purification techniques are expected to alleviate this challenge Recently various water purification techniques along with different computational techniques have been developed For instance water purification techniques such as electromagnetic water purification solute surface interactions in water use of micro magnetofluidic devices UV led water purification and use of membranes can be thoroughly investigated by using a range of computation techniques such as molecular dynamics the lattice Boltzmann method and the Navier Stokes method based solver Advanced Computational Approaches for Water Treatment Applications in Food and Chemical Engineering presents these different numerical techniques and traditional modeling and simulation approaches to elaborate on and explain the various water purification techniques Features Serves as a dedicated reference for this emerging topic Discusses state of the art developments in advanced computational techniques for water purification Brings together diverse experience in this field in one reference text Provides a roadmap for future developments in the area This book is primarily intended for chemical engineers hydrologists water resource managers civil engineers environmental engineers food scientists and food engineers interested in understanding the numerical approaches for different water purification techniques such as membrane sedimentation filtration micromagnetofluidic device and ozone UV among others **Cumulative Index to NASA Tech Briefs** , **Chemical Economy & Engineering Review** ,1981 **U.S. Government Research & Development Reports** ,1970 *Solar Energy Engineering* Soteris A Kalogirou, 2023-12-01 Solar Energy Engineering Processes and Systems Third

Edition includes updated chapters and extended resources to assist in the research and teaching of solar energy engineering. Sections cover advances in solar collectors, solar water heating, solar space heating and cooling, industrial process heat, solar desalination, photovoltaic technology, solar thermal power systems, modeling of solar energy systems, and a new chapter on wind energy systems. This book provides students, teachers, and professionals with the basic principles and applications of solar energy systems and processes to help them understand how to operate and design solar systems. In addition, this best-selling title includes a student and academic companion site with additional materials on chapter PowerPoints for teaching problems, with a solutions manual and equations files to assist in problem solving. Written by one of the world's most renowned experts in solar energy with over thirty years of experience in renewable and solar energy applications. Features a new student and professor companion site with study questions and exercises, problem solving files, formulas, and teaching support materials. Provides updated chapters including new sections detailing solar collectors, uncertainties in solar collector performance testing, building integrated photovoltaics, BIPV, thermosiphonic systems, performance prediction, and solar updraft tower systems. Includes reference tables and schematic diagrams for the most used systems. Bibliography of Scientific and Industrial Reports, 1971. *Removal of Pollutants from Saline Water* Shaik Feroz, Detlef W.

Bahnemann, 2021-12-22. *Removal of Pollutants from Saline Water Treatment Technologies* provides a comprehensive understanding of technologies that are currently adopted in the treatment of pollutants present in saline water systems. It provides information on the treatment technologies for saline water systems including seawater, brackish water, oil produced water, and other industrial saline wastewaters. **FEATURES** Presents information exclusively for saline water pollutant removal. Introduces current treatment technologies and addresses why and how the techniques differ between fresh and salt water. Offers an inclusive overview of physicochemical, biological, membrane, and advanced oxidation treatment technologies. Features various perspectives and case studies from relevant global experts. Provides a comprehensive one-stop source for the treatment of pollutants in all saline water systems. Aimed at students, academicians, researchers, and practicing engineers in the fields of chemical, civil, marine, and environmental engineering who wish to be acquainted with the most recent developments in the treatment of pollutants present in saline water systems. Prof. Dr. Shaik Feroz works at Prince Mohammad Bin Fahd University, Kingdom of Saudi Arabia. He has 30 years of experience in teaching, research, and industry. He has more than 190 publications to his credit in journals and conferences of international repute. He was awarded Best Researcher by Caledonian College of Engineering for the year 2014. Prof. Dr. Detlef W. Bahnemann is Head of the Research Unit Photocatalysis and Nanotechnology at Leibniz University Hannover, Germany. Director of the Research Institute Nanocomposite Materials for Photonic Applications at Saint Petersburg State University, Russian Federation, and Distinguished Professor at Shaanxi University of Science and Technology in Xi'an, People's Republic of China.
