More Picture-perfect Science Lessons Karen Rohrich Ansberry, Emily Rachel Morgan, 2007 Teacher's handbook for teaching science

Picture-Perfect Science Lessons Karen Rohrich Ansberry, Emily Morgan, 2010 How do you improve upon perfection? For years new and experienced elementary school teachers alike have extolled the virtues of Picture Perfect Science Lessons: the expertly combined appeal of children's picture books with standards-based science content. The award-winning bestselling book presents ready-to-teach lessons complete with student pages and assessments that use high-quality fiction and nonfiction picture books to guide hands-on science inquiry. This newly revised and expanded 2nd edition of Picture Perfect Science Lessons manages to surpass the original Classroom veterans Karen Ansberry and Emily Morgan who also coach teachers through nationwide workshops. Now elementary educators are usually crunched for science instructional time and could often use refresher explanations of scientific concepts. So the authors added comprehensive background notes to each chapter and included new reading strategies. They still show you exactly how to combine science and reading in a natural way with classroom-tested lessons in physical science, life science, and Earth and space science. And now they offer five brand-new lessons: Batteries Included, The Secrets of Flight, Down the Drain, If I Built a Car, and Bugs, bringing the total to 20. Picture Perfect Science Lessons draws on such diverse and engaging books as Dr. Xargle's Book of Earth Hounds, A House for Hermit Crab, Rice Is Life, Oil Spill, Sheep in a Jeep, The Perfect Pet, and Weird Friends. Unlikely Allies in the Animal Kingdom. As a result, both reluctant scientists and struggling readers will quickly find themselves absorbed in scientific discovery. You'll love how effective this book is, and your students will love learning about science.

Collecting for the Curriculum Amy J. Catalano, 2015-09-28 If you're a librarian charged with collecting curriculum materials and children's literature to support the Common Core State Standards, then this book is the only one that offers explicit advice on collection development in curriculum collections. While there are many publications on the Common Core for school librarians and K-12 educators, no such literature exists for curriculum librarians at the post-secondary level. This book fills that gap, standing alone as a guide to collection development for curriculum librarians independent of the Common Core State Standards (CCSS). The book provides instruction and guidance to curriculum librarians who acquire and manage collections so you can develop a collection based on best practices. The book begins with a primer on the CCSS and how curriculum librarians can support them. Discussion of the Standards is then woven through chapters arranged by content area that share research-based practices in curriculum development and instruction to guide you in curriculum selection. Material types covered include games, textbooks, children's literature, primary sources, counseling, and nonfiction. Additional chapters cover the management of curriculum collections, testing collections, and instruction and reference, as well as how to support and collect for special needs learners. Current practices in collection development for curriculum materials librarians are also reviewed. The book closes with a discussion of the future of curriculum materials.

Science with Storytelling Jane

Stenson, Sherry Norfolk, Lynette J. Ford, 2016-12-12 This book is about the intersection of storytelling and science Recognizing that humans are hard wired for narrative this collection of new essays integrates the two in a special way to teach science in the K 6 classroom As science education changes its focus to concepts that bridge various disciplines along with science and engineering practices storytelling offers opportunities to enhance the science classroom Lesson plans are provided each presenting a story its alignment with science Next Generation Science Standards language arts Common Core State Standards and theater arts standards National Core Arts Standards Instructional plans include a rationale preparation activities and assessment *Uncovering Student Ideas in Physical Science, Volume 1* Page D. Keeley, Rand Harrington, 2010-05-15 This is a must have book if you re going to tackle the challenging concepts of force and motion in your classroom Using Paired Text to Meet the Common Core William Bintz, 2014-12-11 Teaching students to make connections across related texts promotes engagement and improves reading comprehension and content learning This practical guide explains how to select and teach a wide range of picture books as paired text two books related by topic theme or genre in grades K 8 The author provides mini lessons across the content areas along with hundreds of recommendations for paired text each linked to specific Common Core standards for reading literature and informational texts In a large size format for easy photocopying the book includes 22 reproducible graphic organizers and other useful tools Purchasers also get access to a Web page where they can download and print the reproducible materials **Structuring Learning Environments in Teacher Education to Elicit Dispositions as Habits of Mind** Erskine S. Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2022-04-01 Science is unique among the disciplines since it is inherently hands on However the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments How do we as science teachers deliver high quality experiences in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning Killham et al 2014 Wong et al 2018 PreK 12 teachers consistently report feeling underprepared or overwhelmed by online learning environments Molnar et al 2021 Seaman et al 2018 This is coupled with persistent challenges related to elementary teachers lack of confidence and low science teaching self efficacy Brigido Borrachero Bermejo Gunning Duran Duran 2004 Ideal for undergraduate teacher candidates graduate students teacher educators classroom teachers parents and administrators this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research based foundation
