The Routledge Handbook of Geospatial Technologies and Society Alexander J. Kent, Doug Specht, 2023-08-17 The Routledge Handbook of Geospatial Technologies and Society provides a relevant and comprehensive reference point for research and practice in this dynamic field. It offers detailed explanations of geospatial technologies and provides critical reviews and appraisals of their application in society within international and multi-disciplinary contexts as agents of change. The ability of geospatial data to transform knowledge in contemporary and future societies forms an important theme running throughout the entire volume. Contributors reflect on the changing role of geospatial technologies in society and highlight new applications that represent transformative directions in society and point towards new horizons. Furthermore, they encourage dialogue across disciplines to bring new theoretical perspectives on geospatial technologies from neurology to heritage studies. The international contributions from leading scholars and influential practitioners that constitute the Handbook provide a wealth of critical examples of these technologies as agents of change in societies around the globe. The book will appeal to advanced undergraduates and practitioners interested or engaged in their application worldwide.

What is Divine Energy Vipin Gupta, 2021-05-09 What is divine energy is an incredibly profound but straightforward exposition of the science of everything. In this landmark work, Dr. Vipin Gupta begins with the investigation of the quintessential questions for understanding divine energy and managing life joyfully: Who am I? What is the soul? What is the spirit? Who is God? What is religion? What is the purpose of our life? What happens after death? Do we become a star as children's books tell us? What is dark matter? What is a black hole? What is the center of the universe? Is there an Absolute or anything beyond that? Are we truly incapable of creating or destroying energy? Dr. Gupta traces the journey of a cell, its origins in an atom, its transformation into energy, and how energy norms the potential of divinity within each person. He clarifies ninety-six paths of self-development for realizing this potential. He shows that contrary to the present understanding, a cell's development involves thirty-three phases. The work is rooted in the state-of-the-art science of microbiological, macrophysical, genetics, India's ancient cultural metaphysics, and a unique energy quantification of the dynamic benefits and costs of everything. It is a part of a series of twelve books that traverses through an understanding of the present reality that can be applied to one's personal life and for societal impact. It offers an unusual integration which the beta readers report as never seen anything like this before and overwhelming because of its originality, technicality, and comprehensiveness. Dr. Vipin Gupta has a Ph.D. in managerial science and applied economics from the Wharton School of the University of Pennsylvania. He is a gold medalist from the Postgraduate Program of the Indian Institute of Management Ahmedabad, India. He is a Professor of sensible management and appropriate science at the Jack H. Brown College of Business and Public Administration, California State University, San Bernardino, USA.
