## The Case

A murder has occurred in the town of San Antonio, TX. As top-notch biology students at Johnson High School, you have been asked to assist in the investigation of this most unfortunate incident. Central to identifying the individual who committed this crime is establishing where the victim was the day of the crime so that detectives can question the individuals with whom the victim came into contact. An autopsy was performed on the victim and has revealed that the victim ate just prior to the time of death. Upon questioning the victim's friends and family, detectives working the case have learned that the victim enjoyed eating at the following places.

### Grimaldi's Pizzeria

The victim would never eat thin crust pizza from anywhere else! The victim would typically order a pizza with sausage, pepperoni, and bacon.

**What macromolecules would you expect to find in the stomach contents of the victim if the victim's final meal was eaten here?**

### Buffalo Wild Wings

The victim would hang out here to watch sporting events while feasting on (non-breaded) Blazin' wings.

**What macromolecules would you expect to find in the stomach contents of the victim if the victim's final meal was eaten here?**

### Olive Garden

The victim loved to go here for a night of bread, fettuccine alfredo and a slice of yummy cheesecake!

**What macromolecules would you expect to find in the stomach contents of the victim if the victim's final meal was eaten here?**
