EVOLUTION 101

You are about to play NOVA's Evolution Lab—a game that will help you to understand the ways scientists piece together the tree of life. But before you begin Mission 1, "Training Trees," watch the introductory video, "Evolution 101," and answer questions 1–5 below.

1. According to the video, what are the two key ingredients to natural selection?
 - a. Predation and the environment
 - b. Reproduction and predation
 - ☒ c. Reproduction and variation
 - d. The environment and variation
2. What does "the fittest" mean in an evolutionary sense?
 - a. The strongest
 - b. The longest lived
 - ☒ c. The most reproductively successful
 - d. The best able to avoid being eaten
3. Evolution is:
 - a. Fixed in one direction
 - b. Completely random
 - ☒ c. Neither entirely fixed nor entirely random
4. What is happening in this image? How does it help to illustrate the concept of natural selection?

The bird is eating the yellow insect. This is probably because it was easier to see and catch than the green one, which is blended in with the leaf. This illustrates natural selection because a variation (green color) is giving some of the insects an advantage that will help them to survive longer and reproduce more frequently than the yellow-colored insects.

5. According to the video, what is the goal of the tree of life?
 - a. To summarize the fossil record
 - b. To describe how natural selection works
 - c. To be a library of all life that has ever lived
 - ☒ d. To explain how all species are related to each other
