Madhav, 2023-09-06 **From Lucy to Language** Donald C. Johanson, Blake Edgar, 1996 Now revised and updated this groundbreaking volume by one of the world's foremost paleontologists presents the most complete visual proof ever assembled of the evidence for human evolution displaying in full color all the key fossils and artifacts of human prehistory

The Infested Mind Jeffrey Lockwood, 2013-09-25 The human reaction to insects is neither purely biological nor simply cultural And no one reacts to insects with indifference Insects frighten disgust and fascinate us Jeff Lockwood explores this phenomenon through evolutionary science human history and contemporary psychology as well as a debilitating bout with entomophobia in his work as an entomologist Exploring the nature of anxiety and phobia Lockwood explores the lively debate about how much of our fear of insects can be attributed to ancestral predisposition for our own survival and how much is learned through individual experiences Drawing on vivid case studies Lockwood explains how insects have come to infest our minds in sometimes devastating ways and supersede even the most rational understanding of the benefits these creatures provide No one can claim to be ambivalent in the face of wasps cockroaches or maggots but our collective entomophobia is wreaking havoc on the natural world as we soak our food homes and gardens in powerful insecticides Lockwood dissects our common reactions distinguishing between disgust and fear and invites readers to consider their own emotional and physiological reactions to insects in a new framework that he's derived from cutting edge biological psychological and social science

The Vegan Evolution Gregory F. Tague, 2022-06-14 Arguing for a vegan economy this book explains how we can and should alter our eating habits away from meat and dairy through sociocultural evolution Using the latest research and ideas about the cultural ecology of food this book makes the case that through biological and especially cultural evolution the human diet can gravitate away from farmed meat and dairy products The thrust of the writing demonstrates that because humans are a cultural species and since we are evolving more culturally than biologically it stands to reason for health and environmental reasons that we develop a vegan economy The book shows that for many good reasons we don't need a diet of meat and dairy and a call is made to legislative leaders policy makers and educators to shift away from animal farming and inform people about the advantages of a vegan culture The bottom line is that we have to start thinking collectively about smarter ways of growing and processing plant foods not farming animals as food to generate good consequences for health the environment and therefore animals This is an attainable and worthy goal given the mental and physical plasticity of humans through cooperative cultural evolution This book is essential reading for all interested in veganism whether for ethical environmental or health reasons and those studying the human diet from a range of disciplines including cultural
