Example Of Crystal Report In Asp Net:

Crystal Reports .NET Programming Brian Bischof, 2004 I wrote this book from the perspective of a programmer wanting to learn how to integrate reports within a NET application I've been working with Crystal Reports since Visual Basic 3 and it's always been difficult to find technical information on report writing I spent a year and a half researching what NET programmers need to successfully create implement and deploy a Crystal Reports application I even put the book on the internet for everyone to read for free all of last year This generated an incredible number of emails from programmers telling me what they liked disliked and what was missing from the book I learned that there are two distinct types of NET programmers using Crystal Reports The first type of programmer doesn't have much experience with Crystal Reports and wants a series of tutorials to help them build reports from scratch For this programmer I wrote 13 chapters which teach you everything about adding reports to ASP NET and Windows applications It starts with the basics of building reports to adding charts crosstab reports sorting and grouping subreports and using the formula editor with Basic syntax and Crystal syntax The second type of programmer has been using Crystal Reports for years and is mostly concerned with how to do technical runtime customization of reports For this programmer I researched and diagrammed the undocumented report object models I included dozens of examples in both VB NET and C to show you how to modify reports manipulate different data sources XML ADO NET ODBC OLE DB stored procedures with parameters modify formulas and report parameters and integrate NET with the RAS and RDC The dozens of emails I received when the book was online were instrumental for doing a major revision of many chapters before publishing the book in hardcopy format Since releasing the book I continue to receive more emails from people They regret that the free book isn't online anymore but understand that it couldn't last forever and that the hardcopy version is even better I hope you like it and that it helps you achieve your reporting goals September 2004 Update Due to high demand I did a second printing of the book I took advantage of this opportunity to go through the book and remove all grammatical errors The content is the same but the typos have been corrected

Integrating Crystal Reports into an ASP.NET Application Vincent Varallo, 2010-11-17 This Wrox Blox provides step by step instructions on how to incorporate the Crystal Reports for NET into an ASP NET application Reporting is a key ingredient for polishing up applications especially enterprise applications or line of business applications You can quickly and easily build an ASP NET application that allows a manager to run reports to get this information rather than display it in a simple HTML page In this Wrox Blox you'll learn how to dynamically format reports easily group data display subtotals as well as grand totals sort data filter data and even export the report as a PDF There are plenty of applications that allow users to enter data into a database but for some reason reports always seem to be forgotten when it comes to designing the application For many business applications a report is the only output the person paying for the application is looking for How fast are the data entry operators entering data How many support calls are being logged How many bugs are in the application Do these types of

requests sound familiar It's usually upper management asking these questions and the last thing you want them to do is actually go into the application to get this information that opens up a whole new can of worms Crystal Reports for .NET truly is a magnificent tool to polish off your application and keep your managers happy while keeping the users productive
