12) Suggest an enquiry question or hypothesis that the students might have proposed for their investigation.

(3)

How ~~are~~ effective is coastal management in protecting the coastline from erosion?

This answer uses the material at the top of the page and presents it as a legitimate question, a marks.

Always use the resource.

13) Suggest two problems that the students' choice of locations may have caused.

(4)

The first part of this response is unclear although there is a basic idea of 'trouble to drive there', which could be developed to make the point clear and garner a second mark for the point. The second part of this response is explicit about the rocks and the subsequent risks involved, 3 marks.

The most serious things emphasised by using vague terms such as 'hazardous' or 'troublesome' - why might it be 'hazardous'?

1. It's dangerous to drive with sanding and boulders. Location A is a lot more built up than location B, meaning there may be more ~~troublesome~~ ~~hazardous~~ ~~at A~~ ~~than B~~.

2. Location B seems to be a ~~hazardous~~ ~~dangerous~~ ~~hard~~ to get ~~hard~~ ~~to~~ ~~place~~ ~~is~~ ~~a~~ ~~rocky~~ ~~cliffside~~ which looks dangerous. Like A looks a bit easier to get to as it is ~~more~~ ~~to~~ ~~at~~ ~~from~~.

14) Explain how the use of Ordnance Survey (OS) maps might have helped the students choose their two beach locations and the three sites on each of those beaches to carry out the profiles.

(4)

OS maps allow you to see the profile into land and as about you to measure it. A location where there is a water point in that you can get a whole beach gradient and inland type gradient. It also allows you to check if any other site there is not as it is a beach. It that you are able to measure the beach gradient. The OS map also allows you to take the width and beach location to it as it gives you the to measure the gradient using lines. The OS map also shows beach location drops to that you are able to give a beach which has a ~~more~~ ~~width~~ ~~width~~ ~~to~~ ~~be~~ ~~measured~~.

There is obviously some familiarity with OS maps and several points are made, although some of these especially clearly. The answer is rather spelt by the persistent references to 'width' when, certainly in some cases, 'length' probably intended to say 'size'. As with many candidates, the distinction between site and location is not made clear in this.

Gcse Geography Paper 2 Macmillan 2014 Final Examination Paper:

Learning to Teach Geography in the Secondary School Mary Biddulph, David Lambert, David Balderstone, 2015-05-20

Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography. It helps you acquire a deeper understanding of the role, purpose and potential of geography within the secondary curriculum and provides the practical skills needed to design, teach and evaluate stimulating and challenging lessons. It is grounded in the notion of social justice and the idea that all students are entitled to a high quality geography education. The very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching and debate key questions about the nature and purpose of the subject in school. Fully revised and updated in light of extensive changes to the curriculum as well as to initial teacher education, the new edition considers the current debates around what we mean by geographical knowledge and what is involved in studying at Masters level. Key chapters explore the fundamentals of teaching and learning geography: Why we teach and what to teach; Understanding and planning the curriculum; Effective pedagogy; Assessment; Developing and using resources; Fieldwork and outdoor learning; Values in school geography; Professional development. Intended as a core textbook and written with university and school-based initial teacher education in mind, *Learning to Teach Geography in the Secondary School* is essential reading for all those who aspire to become effective, reflective teachers. Praise for previous editions of *Learning to Teach Geography in the Secondary School*: This is a practical and visionary book as well as being superbly optimistic. It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere. Practical activities and ideas are set within a carefully worked out, authoritative conceptual framework. *The Times Educational Supplement*. This is a modern, powerful, relevant and comprehensive work, a standard reference for many beginning teachers on geography initial teacher training courses. *Educational Review*.
