Carroll Gantz,2015-07-13 For thousands of years humans coped with heat by harvesting and storing natural ice and devising natural cooling systems that utilized ventilation and evaporation By the mid 1800s people began developing huge refrigeration machines to manufacture ice By the early 1900s engineers developed electric domestic refrigerators which by 1927 were affordable convenient household appliances By then an increasingly sophisticated public demanded more modern looking appliances than engineers could produce and a new breed of designers entered the manufacturing world to provide them During the Depression modern designs not only increased sales but resulted in the kitchen appliances we now use Today refrigeration preserves perishable food for worldwide distribution makes tropical climates habitable for millions saves lives with medical applications and enables space flight

**Catalog of Copyright Entries. Third Series** Library of Congress. mixers and microwave ovens between 1945 when the all electric home came to be associated with the nation's hard won victory and 2020 as contemporary writers consider the enduring material and spiritual effects of these objects in the 21st century. The appropriation and subversion of the rhetoric of domestic electrification and time saving comprises a crucial but overlooked element in 20th century literary forms and genres including Beat literature, Black American literature, second wave feminist fiction, science fiction and postmodernist fiction. Through close readings of dozens of literary texts alongside print and television ads from this period, Dini shows how U.S. writers have unearthed the paradoxes inherent to claims of appliances' capacity to give back time to their user, transport them into a technologically progressive future or return them to some pastoral past. In so doing, she reveals literary appliances' role in raising questions about gender norms and sexuality, racial exclusion and erasure, class anxieties, the ramifications of mechanization, the perils and possibilities of conformity, the limitations of patriotism and the inevitable fallacy of utopian thinking while both shaping and radically disrupting the literary forms in which they operated.
