Planning and Design for Sustainable Urban Mobility UN-Habitat, 2013-10-30 Urban transport systems worldwide are faced by a multitude of challenges Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars with a limited number of cities improving public transport systems in a sustainable manner However a number of challenges faced by urban transport systems such as greenhouse gas emissions noise and air pollution and road traffic accidents do not necessarily get solved by the construction of new infrastructure Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap The purpose of transportation and mobility is to gain access to destinations activities services and goods Thus access is the ultimate objective of transportation As a result urban planning and design should focus on how to bring people and places together by creating cities that focus on accessibility rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods Urban form and the functionality of the city are therefore a major focus of this report which highlights the importance of integrated land use and transport planning This new report of the United Nations Human Settlements Programme UN Habitat the world's leading authority on urban issues provides some thought provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems The Global Report on Human Settlements is the most authoritative and up to date global assessment of human settlements conditions and trends Preceding issues of the report have addressed such topics as Cities in a Globalizing World The Challenge of Slums Financing Urban Shelter Enhancing Urban Safety and Security Planning Sustainable Cities and Cities and Climate Change

Geospatial Technologies and Geography Education in a Changing World Osvaldo Muñiz Solari, Ali Demirci, Joop van der Schee, 2015-08-31 This book is an initiative presented by the Commission on Geographical Education of the International Geographical Union It focuses particularly on what has been

learned from geospatial projects and research from the past decades of implementing geospatial technologies GST in formal and informal education The objective of this publication is to inform an international audience of teachers professionals scholars and policymakers about the state of the art and prospects of geospatial practices GPs as organized activities that use GST and lessons learned in relation to geographical education GST make up an advanced body of knowledge developed by practitioners of geographic information systems GIS remote sensing RS global positioning systems GPS and digital cartography DC GST have long been applied in many different sectors however their first use in higher education began in the early 1980s and then diffused to secondary schools during the 1990s Starting with GIS and RS it evolved into a much broader context as GST expanded to include GPS and DC with new communication technologies and Internet applications GST have been used around the world as a combination of tools and special techniques to make research teaching and learning more effective

The Rise and Fall of Civic Education Michael Learn,2024-09-16 Social studies is a field in crisis The crisis stems from failure to establish the very foundation of social studies purpose in public education civic education Social studies advocates have never put forth a coherent method for teaching civic education because policymakers and the public have been unable to agree upon a general definition of civic education This issue has disrupted the field since the early days As educators sought to include civic education within public schools as a dedicated field social studies evolved into a blending of history social sciences and civic education Social studies evolution never resolved the differences between the three with each discipline striving to control the narrative Instead of creating a unified field the disciplines devalued social studies and thus any discipline associated with it The Rise and Fall of Civic Education The Battle for Social Studies in a Shifting Historical Landscape investigates the changing definitions and purposes ascribed to social studies in the United States through time This result is viewed through the rising tensions from culture wars as America s divisive politics fight to control the narrative of the disciplines within social studies

The Geography of Uzbekistan Lola Gulyamova,2022-12-02 This book describes the geography of Uzbekistan and its unique history and culture It focuses on the development of Uzbekistan as a result of its location on the crossroads of the Silk Road The influence of global and regional environmental challenges on the current landscape and similar issues are discussed and analyzed from a historical perspective Contemporary tensions and reforms in social economical and cultural life are described with the aim to draw a picture of modern paths to transformation and development The Geography of Uzbekistan includes also information on geology nature and natural resources in particular water The book discusses the social and environmental impacts of the Aral Sea disaster and shows new paths of transformation and development for this Central Asian country

British Columbia's Borders in Globalization Nicole Bates-Eamer,Helga Kristín Hallgrímsdóttir,2021-11-24 This book is a case study collection examining the influences and functions of British Columbia s BC borders in the 21st century British Columbia s Borders in Globalization examines bordering processes and the causes and effects of borders in the Cascadian region from the

perspective of BC The chapters cover diverse topics including historical border disputes and cannabis culture and identity the governance of transboundary water flows migration and preclearance policies for goods and people and the emerging issue of online communities The case studies provide examples that highlight the simultaneous but contradictory trends regarding borders in BC while boundaries and bordering processes at the external borders shift away from the territorial boundary lines self determination local politics and cultural identities re inscribe internal boundaries and borders that are both virtual and real Moreover economic protectionism racial discourses and xenophobic narratives driven by advances in technology reinforce the territorial dimensions of borders These case studies contribute to the literature challenging the notion that territorial borders are sufficient for understanding how borders function in BC and in a few instances they illustrate the nuanced ways in which borders or bordering processes are becoming detached from territory The chapters in this book were originally published as a special issue of the Journal of Borderlands Studies Rule Britannia Danny Dorling,2019-01-15 Things fall apart when empires crumble This time we think things will be different They are not This time we are told we will become great again We will not In this new edition of the hugely successful Rule Britannia Danny Dorling and Sally Tomlinson argue that the vote to leave the EU was the last gasp of the old empire working its way out of the British psyche Fuelled by a misplaced nostalgia the result was driven by a lack of knowledge of Britain s imperial history by a profound anxiety about Britain s status today and by a deeply unrealistic vision of our future **The Physical Geography and Geology of the Driftless Area** Eric C. Carson,J. Elmo Rawling III,J. Michael Daniels,John W. Attig,2019-11-04 Over the course of his 43 year career James C Knox conducted seminal research on the geomorphology of the Driftless Area of southwestern Wisconsin His research covered wide ranging topics such as long term land scape evolution in the Driftless Area responses of floods to climate change since the last glaciation processes and timing of floodplain sediment deposition on both small streams and on the Mississippi River impacts of European settlement on the landscape and responses of stream systems to land use changes This volume presents the state of knowledge of the physical geography and geology of this unglaciated region in the otherwise glaciated Midwest with contributions written by Knox prior to his passing in 2012 and by a number of his former colleagues and graduate students Evaluating the Local Impacts of the Rio Olympics Marcelo Neri,2020-07-05 This book evaluates the local impacts and legacies of the Olympics in Rio by comparing Rio2016 with other Olympic experiences and evaluating the ways in which the Games served the city The 2016 Rio Olympic Games took place in a scenario of enormous economic challenges and persistent inequalities In contrast to all previous Olympic experiences Brazil faced its worst economic recession ever recorded during the preparation phase for the Games In addition to the national crisis falling oil prices and corruption scandals fuelled the State of Rio s economic downfall This book specifically assesses the relative social performance of Rio s city population with respect to control groups covers traditional aspects of the Games legacy such as tourism infrastructure and sports practice includes ordinary day by day aspects of the city s life

such as education employment and housing and scrutinizes critical areas such as urban mobility gentrification and Guanabara Bay s pollution This thorough analysis offers readers further understanding on assessing the impacts and legacies of the Olympic experience It will be of great interest to upper level students and academics of tourism hospitality and events management

Spatial Implications and Planning Criteria for High-Speed Rail Cities and Regions José Maria de Ureña, Chia-Lin Chen, Anastasia Loukaitou-Sideris, Roger Vickerman, 2021-03-29

Spatial Implications and Planning Criteria for High speed Rail Cities and Regions evaluates the varied experiences that HSR systems have brought about to different station cities and their regional territories around the world with an eye towards better future planning and policy of such systems This edited volume draws from examples of high speed rail operations in different cities in Europe and Asia to depict the various impacts of this major transportation infrastructure It attempts to distinguish the short and long term impacts described in the literature classifying them into regional and inter urban effects urban effects and wider economic impacts Planning challenges appear at two major points 1 during the initial planning stage that includes the route and location of stations and 2 during the development process that follows The case studies in the book concentrate on a variety of topics from the impact of high speed rail on population growth in some station cities to the regional economic impacts that an HSR system can bring about to the larger territories it passes through to the potential of station cities to better attract firms or to experience increases in tourism and commerce They also assess planning strategies and experiences from station cities to draw lessons for future HSR planning policies The Chapters in this book were originally published in a special issue of European Planning Studies
