Geography Grade11 September 2014:

Community-Owned Transport Leigh Glover, 2016-11-03 City and state governments around the world are struggling to achieve environmentally sustainable transport. Economic, technological, city and transport planning and human behaviour solutions are often hampered by ineffective implementation. So attention is now turning to institutional, governmental and political barriers. Approaches to these implementation problems assume that transport ownership can only be public owned by state entities or private corporate or personal. Another option largely unexplored to date is communal ownership of transport. *Community Owned Transport* proposes and develops the notion that communal ownership has a historical basis and provides unique opportunities for providing personal mobility. It looks at the historical roots of modern urban transport's failings as those of technological change and the associated governing of transport systems, particularly the role of public sector institutions. Community ownership is explored through the new sharing economy developments: car sharing, ridesharing and bicycle share schemes, and older social innovations in ecovillages and communal living. Models and practices of community ownership of transport are provided, and this study also discusses how community ownership might contribute to sustainable transport. Drawing widely on different disciplines and fields of scholarship, this book explores the conceptual and practical aspects of communal ownership of transport. It will be a valuable resource for those seeking innovative approaches to addressing the pressing problems of transport, including graduate and postgraduate students as well as policymakers, practitioners and community groups.

The China Order Fei-Ling Wang, 2017-08-07 Examines the rising power of China and Chinese foreign policy through a revisionist analysis of Chinese civilization. What does the rise of China represent and how should the international community respond? With a holistic rereading of Chinese longue dure history, Fei Ling Wang provides a simple but powerful framework for understanding the nature of persistent and rising Chinese power and its implications for the current global order. He argues that the Chinese ideation and tradition of political governance and world order, the China Order, is based on an imperial state of Confucian Legalism, as historically exemplified by the Qin Han polity. Claiming a Mandate of Heaven to unify and govern the whole known world or tianxia, all under heaven, the China Order dominated Eastern Eurasia as a world empire for more than two millennia until the late nineteenth century. Since 1949, the People's Republic of China has been a reincarnated Qin Han polity without the traditional China Order, finding itself stuck in the endless struggle against the current world order and the ever-changing Chinese society for its regime survival and security. Wang also offers new discoveries and assessments about the true golden eras of Chinese civilization, explains the great East-West divergence between China and Europe, and analyzes the China Dream that drives much of current Chinese foreign policy. An original, important, well-researched and powerfully argued exploration of the virtues and vices of the Chinese state from its ancient past to its likely future. Edward Friedman, University of Wisconsin-Madison. A masterpiece. Wang provides a grand, sweeping, even epic review of two thousand years of Chinese history. His argument is compelling and

well documented the richness and variety of sources Chinese and English he cites is breathtaking The book is likely to end up on the reading list of every serious student of China s position in the world for many years to come Daniel C Lynch author of China s Futures PRC Elites Debate Economics Politics and Foreign Policy This imaginative and provocative grand tour of Chinese cosmological order and geopolitical strategy past and present is destined to become a classic Ming Xia author of The People s Congresses and Governance in China Toward a Network Mode of Governance

The Knowledge Gap Natalie Wexler, 2020-08-04 Essential reading for teachers education administrators and policymakers alike STARRED Library Journal The untold story of the root cause of America's education crisis It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education The

problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension skills at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system, one that fellow reformers, journalists, and policymakers have long overlooked and of which the general public, including many parents, remains unaware. But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong; it also follows innovative educators who are in the process of shedding their deeply ingrained habits and describes the rewards that have come along. Students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.

[Teacher Education in Professional Learning Communities](#) Xuefeng Huang, 2018-06-20

This book explores the unique experiences of a sister school network in Canada and China, contextualized through the lens of the Reciprocal Learning Project, which supports the relationship between a school network and teacher education exchange program of two countries. Huang uses theoretical viewpoints from teacher learning and comparative education research to analyse and interpret what has happened in the emerging cross-cultural school network. The book juxtaposes teacher learning and comparative education research from Shanghai and Ontario as teachers in the two places interact and provides detailed descriptions of teacher collaboration to show how these collaborations were initiated, developed, and sustained, as well as the impact brought about from these collaborations. The book offers a unique opportunity to examine how Canadian and Chinese teachers receive and react to opportunities of cross-cultural collaboration and learning.
