State against Civil Society Cameron Ross,2017-10-02 Over the period December 2011 July 2013 a tidal wave of mass protests swept through the Russian capital and engulfed scores of cities and regions These demonstrations came as a great shock to the Russian political establishment After decades of passive acceptance of the status quo it appeared that civil society was at last awakening The protests came in the wake of the Arab Spring revolts which toppled authoritarian dictators in Tunisia Egypt and Libya However by the end of 2013 the number of mass protests in Russia and their size had declined precipitously President Putin on returning to office in 2012 had quickly regained the upper hand over the protestors This book examines the reasons for the rise and fall of the mass protests in the Russian Federation Internationally renowned experts in the field of Russian politics from Russia and the UK provide important new insights into the nature of the mass opposition movement the non systemic opposition its strengths and its weaknesses A key novel aspect of the study is its focus on the national and regional dimensions of the protest movement and its class and ethnic dimensions This book was published as a special issue of Europe Asia Studies

Excluded Richard D Kahlenberg,2023-07-11 An indictment of America s housing policy that reveals the social engineering underlying our segregation by economic class the social and political fallout that result and what we can do about it The last acceptable form of prejudice in America is based on class and executed through state sponsored economic discrimination which is hard to see because it is much more subtle than raw racism While the American meritocracy officially denounces prejudice based on race and gender it has spawned a new form of bias against those with less education and income Millions of working class Americans have their opportunity blocked by exclusionary snob zoning These government policies make housing

unaffordable frustrate the goals of the civil rights movement and lock in inequality in our urban and suburban landscapes Through moving accounts of families excluded from economic and social opportunity as they are hemmed in through new redlining that limits the type of housing that can be built Richard Kahlenberg vividly illustrates why America has a housing crisis He also illustrates why economic segregation matters since where you live affects access to transportation employment opportunities decent health care and good schools He shows that housing choice has been socially engineered to the benefit of the affluent and that astonishingly the most restrictive zoning is found in politically liberal cities where racial views are more progressive Despite this there is hope Kahlenberg tells the inspiring stories of growing number of local and national movements working to tear down the walls that inflicts so much damage on the lives of millions of Americans *A Global Idea* Mayssoun Sukarieh, 2023-08-15 *A Global Idea* outlines how youth as shown by the Arab Spring uprisings and subsequent state responses became a prominent social and political category during the first two decades of the twenty first century in the Middle East Drawing on ethnographic fieldwork interview data and textual analysis Mayssoun Sukarieh explains that the spread of youth as an important category is linked to the operation of a global youth development complex a diverse transnational network of state private sector civil society and international development aid organizations that worked through key urban areas such as Washington DC Amman and Dubai In its analysis of the arrival extension and embedding of the youth development complex in the Middle East during this period *A Global Idea* addresses a broader question that is of global and not just regional concern How are certain ideas that are central to the working and reproduction of global capitalism able to travel the world so that they are found virtually everywhere **Empire's Labor** Adam D.
