Big Ideas in Education Dr Russell Grigg, 2016-06-02 Big Ideas in Education What Every Teacher Should Know by Dr Russell Grigg provides an accessible and easily understood introductory guide to the big ideas that really matter in education The teaching profession is saturated with ideas Unfortunately some of these are half baked or fundamentally flawed Dr Russell Grigg moves beyond the unhelpful supposed dichotomies that pervade current educational thinking child centred versus teacher centred traditional versus progressive Throughout the book readers are invited to question assumptions and popular rhetoric and reflect on their own experiences Big Ideas in Education aims to equip teachers with a good understanding of current thinking in a diverse fluid and dynamic field Each of the big ideas is discussed within the framework of four questions what is the big idea who is behind it why is it important and what can you do Big ideas are important distinctive empowering adaptable and simple to understand Dr Russell Grigg provides readers with a concise and reliable introduction to twelve such ideas which are at the core of educational practice The ideas chosen are general rather than subject specific in nature In turn they invite the reader to look at teaching in wider society address elements of learning which teachers actively promote raise questions about why how and what to teach and finally look at ways of improving the quality of education The twelve big ideas under discussion are

International Handbook on Geographical Education Rod Gerber, 2013-03-09 I am very pleased to have been asked by Rod Gerber to provide a preface to such a book Not least

because of the twenty four chapters eight are written by former students or colleagues with whom I have worked in the past and whom I still meet at conferences on geographical education It is with a certain pride and joy that I note the progress which has been made in geographical education both in its day to day teaching and in research in the twenty years following the end of my term of office as Chair of the Commission on Geographical Education of the International Geographical Union CGEIUG My successors Joe Stoltman Hartwig Haubrich Rod Gerber and now Lea Houtsonen have done much and are continuing to work hard to foster the development of geographical education This book is proof if proof were needed that the international collaboration in this field is alive and well with contributions coming from all the continents except Antarctica It would be a moribund subject that remained unaffected in one way or another by developments on the great world stage as Fairgrieve 1926 would have put it And as Rod Gerber shows the issues of globalisation of cultural encounters of differing value systems of new technologies of variable economic development and of environmental quality all feature as topics which influence and are influenced by geographical education

Paradigms in Cartography Pablo Iván Azócar
