Geography November 2014 Memo Paper 1:

The Geography of Mobility, Wellbeing and Development in China Wenjie Wu, Yiming Wang, 2020-02-25 Big data is increasingly regarded as a new approach for understanding urban informatics and complex systems Today there is unprecedented data availability with detailed remote sensed data on the built environment and rich mineable web based sources in the form of social media web mapping information services and other sources of unstructured big data This book brings together a group of international contributors to consider the geographical implications of mobility wellbeing and development within and across Chinese cities through location based big data perspectives The degree of urban sprawl productive density and vibrancy can be reflected from location based social media big data The challenge is to identify map and model these relationships to develop cities at different places in the urban hierarchical system that are more sustainable This edited book aims to tackle these issues through two inter related geographical scales inter city level and intra city level The text is designed for graduate courses in planning geography public policy and administration and for international researchers who are involved in urban and regional economics and economic geography

The World's Search for Sustainable Development Mukul Sanwal, 2015-11-05 This text traces the evolution of sustainable development and climate change from the time it emerged in international consultations and agreements The three sections of the book focusing on the framework climate change and sustainable development seek to cover the essentials of the politics of natural resource usage at the global level The book explores the evolution of sustainable development and climate change within the framework of the United Nations and the way the concept has been defined through intergovernmental meetings agreements and consensus within the multilateral system It also explores the best ways of reducing the risk to the planet while enabling societies to pursue sustainable development paths The challenges call for a transformation of social systems to facilitate a broadly acceptable change The book also explores the adoption of low carbon models different from the high carbon socio technical systems and related social practices

The Shadow of Kenyan Democracy Dominic Burbidge, 2016-03-09 Why has democracy failed to reduce corruption in Kenya Framing the challenge in game theoretical terms Dominic Burbidge examines how mutual expectations between citizens dictate the success or failure of political reforms Since 1992 Kenya has conducted multiparty elections with the hope of promoting accountability and transparency in government This is being undermined by ongoing corruption and an increasingly centralised state response to terrorism Providing a nuanced assessment of democracy's difficult road in Kenya Burbidge discusses the independent role being played by widespread social expectations of corruption Through tracking average views of the average person it is possible to identify a threshold beyond which society suffers mutually reinforcing negative social expectations This trend is the shadow of Kenyan democracy and must be treated as a policy challenge on its own terms before institutional reforms will be successful

Indian & World Geography (General Studies

Volume-2) YCT Expert Team , 2022 23 All IAS PCS General Studies Volume 2 Indian World Geography Chapter wise Solved Papers *Handbook of the Politics of the Arctic* Leif Christian Jensen, Geir Hønneland, 2015-09-25 The Arctic has again become one of the leading issues on the international foreign policy agenda in a manner unseen since the Cold War Drawing on the perspectives of geo politics and international law this Handbook offers fresh insights and perspectives on the most pressing issues grouped under the headings of political ascendancy climate and environmental issues resources and energy and the response and policies of affected countries **The Great Divide: Regional Inequality and Fiscal Policy** William Gbohou, W. Raphael Lam, Victor Duarte Lledo, 2019-05-02 Growing regional inequality within countries has raised the perception that some places and people are left behind This has prompted a shift toward inward looking policies and away from pro growth reforms This paper presents novel stylized facts on regional inequality for OECD countries It shows that regional disparity in per capita GDP is large even after adjusting for regional price differences persistent and widening over time The paper also finds that rising nationwide income inequality is associated with both rising within region income inequality and widening average income across regions The rise in inequality is related to declining incentives for interregional labor mobility especially for poor households in lagging regions which are estimated to reduce by as much as one third in the United States Against these facts the paper proposes a framework to identify whether how and by whom fiscal policies can be used to tackle regional inequality It outlines conditions under which those policies should be spatially targeted and illustrates how they can be complementary to conventional means testing methods in mitigating income inequality *On Unemployment* Mark R. Reiff, 2015-10-07 With unemployment at historically high rates that show signs of becoming structural there is a pressing need for an in depth exploration of this economic injustice Unemployment is one of the problems most likely to put critical pressure on our political institutions disrupt the social fabric of our way of life and even threaten the continuation of liberalism itself Despite the obvious importance of the problem of unemployment however there has been a curious lack of attention paid to this issue by contemporary non Marxist political philosophers On Unemployment explores the moral implications of the problem of unemployment despite the continuing uncertainty involving both its causes and its cures Reiff takes up a series of questions about the nature of unemployment and what justice has to tell us about what we should do if anything to alleviate it The book comprehensively discusses the related theory and suggests how we might implement these more general observations in the real world It addresses the politics of unemployment and the extent to which opposition to some or all of the book s various proposals stem not from empirical disagreements about the best solutions but from more basic moral disagreements about whether the reduction of unemployment is indeed an appropriate moral goal This exciting new text will be essential for scholars and readers across business economics and finance as well as politics philosophy and sociology **Urban Transformations** Sigrun Kabisch, Florian Koch, Erik Gawel, Annegret Haase, Sonja Knapp, Kerstin Krellenberg, Jaime Nivala, Andreas

Zehnsdorf,2018-01-08 The book addresses urban transformations towards sustainability in light of challenges of global urbanization processes and the consequences of global environmental change The aim is to show that urban transformations only succeed if both innovative scientific solutions and practice oriented governance approaches are developed This assumption is addressed by providing theoretical insights and empirical evidence pointing particularly at 3 concepts or qualities which are determined here as being central for achieving urban sustainability resource efficiency quality of life and resilience Urban case studies from several international research projects illustrate our conceptual approach of urban transformations towards sustainable development Thus the book reaches far beyond a mere additive description of single case studies It incorporates the results of condensed synthesis resulting from comparisons and evaluations It provides based on cross cutting reflection of single cases and different scales and methods of analysis general and transferable findings They do not only consider the scientific sphere but deliberately go beyond it discussing transferability of knowledge into practice governance options and the feasibility of policy strategies in order to pave the way for sustainable urban transformations to happen today and in the future *Geography Education Research in the UK: Retrospect and Prospect* Graham

Butt,2019-08-22 This book provides a unique assessment of the development of research in geography education and its future prospects offering a challenging critique of subject based education research with particular reference to geography education across a range of different jurisdictions It covers a range of topics including the changing role of research in geography education the relationship between education research and professional practice with special reference to geography education research the place of academic subject knowledge in geography education research critiques of the functions of research in geography education and the key issues for education policy and policymakers concerning educational research at national and international levels Importantly in a period marked by radical change for education research and researchers the book offers a timely appraisal of possible ways forward for geography education research Addressing the needs of academics research students policymakers and education practitioners who undertake use or shape the future of research in geography education it comprehensively explores the forces that have driven the development of geography education research and pedagogy Further by positioning its analysis in the context of education policy debates in the UK and further afield it assesses the role and function of research in education and offers an outlook on its future This book is essential reading for all those who wish to understand the sporadic and increasingly uncertain development of subject based research in education
