been supported by nature and its resources for centuries man has been exploiting these resources for his survival and
development In the rapid march of progress the balance that needs to be maintained between exploitation and regeneration
was however largely ignored With the increase in population there has thus been great pressure on these resources leading
to their scarcity and degradation Proper Planning for management of growth is possible only when relevant information of
resource population availability of social and industrial infrastructure and the trends in growth are known The aim of the
books is comprehension and understanding through functional co relation Detailed in information is furnished for the
purpose of illustrating a point and general functional relationship The Subject has been treated in its regional aspects and an
attempt has been made to preserve a balance between the physical human and economic aspects in this book In a book
dealing with a state such as Rajasthan where agriculture animal husbandry and mining industry are of a paramount
importance it is natural that much space has been devoted to these aspects of economic geography This book provides
updated information regarding land people available resources and infrastructural facilities mainly through maps graphs
