Geography Paper 2 Grade 12014 Memorandum:

Structural Racism Stephen Menendian, 2025-06-30 This book explains how racial inequality in the United States is produced and perpetuated and what should be done about it It develops the elusive concept of structural racism presenting a precise definition that is clear and comprehensible and illustrates how it operates methodically and rigorously Many other books are long on problems and short on solutions whereas this book develops the key principles that must ground a structural reform agenda and then presents a broad ranging set of interventions organized around ten themes that will reduce racial disparities while expanding opportunity for all Unlike most books on race which focus on a particular issue or sector this book is comprehensive in its scope encompassing the vital systems that shape racial inequality in contemporary American society from education and public schools to income and wealth disparities to housing and health care to policing and the criminal justice system As such this book is the ideal text for readers seeking to learn more about structural racial inequality in society how it came to be that way and what we should do about it while deepening our understanding and challenging many misguided or simplistic prevailing notions In a time of backlash to racial justice and growing doubts about racial equity initiatives this book is a timely and necessary entry A must read for advocates students policymakers and researchers alike

America's Moment Rework America, 2015-06-15 It is time for a new conversation Amid the biggest economic transformation in a century the challenge of our time is to make sure that all Americans benefit from the wave of digital revolutions around the world that have permeated and upended modern life Yet today's economic arguments seem stuck We need a new vision of a hopeful future and a new action agenda So many Americans are uncertain about the future How can there be so many paths to opportunity with so few people traveling them As a nation we have to understand what is required to help Americans succeed now and how to prepare our country for what comes next We have been here before A hundred years ago America experienced the greatest economic transformation and technological revolution in its history The transformation of the past twenty years as the world has moved through the information era into the digital age has turned our life and work upside down once again It is a time of tremendous change but also of tremendous possibility Rework America is a group of American leaders who know from experience the challenges we face and the potential solutions In America's Moment they suggest a practical agenda for an exciting future It is illustrated by people who are already showing the way and includes actions Americans can take today in their own communities preparing people to succeed using the reach of the Internet and data to innovate jobs and to reach new markets all over the world using technology to match employers and workers and transitioning to a no collar working world neither blue collar nor white collar Set against the history of how Americans succeeded once before in remaking their country America's Moment is about the future It describes how the same forces of change technology and a networked world can become tools that can open opportunity to everyone

Excluded Richard D Kahlenberg, 2023-07-11 An indictment of America's housing policy that reveals the social

engineering underlying our segregation by economic class the social and political fallout that result and what we can do about it The last acceptable form of prejudice in America is based on class and executed through state sponsored economic discrimination which is hard to see because it is much more subtle than raw racism While the American meritocracy officially denounces prejudice based on race and gender it has spawned a new form of bias against those with less education and income Millions of working class Americans have their opportunity blocked by exclusionary snob zoning These government policies make housing unaffordable frustrate the goals of the civil rights movement and lock in inequality in our urban and suburban landscapes Through moving accounts of families excluded from economic and social opportunity as they are hemmed in through new redlining that limits the type of housing that can be built Richard Kahlenberg vividly illustrates why America has a housing crisis He also illustrates why economic segregation matters since where you live affects access to transportation employment opportunities decent health care and good schools He shows that housing choice has been socially engineered to the benefit of the affluent and that astonishingly the most restrictive zoning is found in politically liberal cities where racial views are more progressive Despite this there is hope Kahlenberg tells the inspiring stories of growing number of local and national movements working to tear down the walls that inflicts so much damage on the lives of millions of Americans

Asymmetric Crisis in Europe and Possible Futures Johannes Jäger, Elisabeth Springler, 2015-04-10

The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics
