

English Paper 1

Stage 4

Name

Section A: Reading

Spend 20 minutes on this section.

Read this text from a webpage about bees and then answer the questions.

All about bees

A bee is an insect that has three body parts: a head, a thorax and an abdomen. It also has six legs and four wings.

Bees fly from flower to flower, sipping nectar and collecting pollen. In the hive, where they live, the nectar is turned into honey to use as food. The pollen that bees collect helps plants to reproduce (make more plants). Flowers that attract bees are usually yellow, blue or purple. Many bees look for only one type of flowering plant, which stops different bees from fighting over the same flower!

There are thousands of bees in each hive. All the bees in the hive work together and help each other. Every bee has a job to do. The queen bee lays the eggs; the worker bees build the honeycomb (the place the honey is stored), collect food and care for the larvae (baby bees).

Bees are the only insects in the world that make food people can eat. They also help our crops and plants grow.
