Cyclescapes of the Unequal City John G. Stehlin, 2019-10-01 A critical look at the political economy of urban bicycle infrastructure in the United States Not long ago bicycling in the city was considered a radical statement or a last resort and few cyclists braved the inhospitable streets of most American cities Today however the urban cyclist represents progress and the urban renaissance City leaders now undertake ambitious new bicycle infrastructure plans and bike share schemes to promote the environmental social and economic health of the city and its residents Cyclescapes of the Unequal City contextualizes and critically examines this new wave of bicycling in American cities exploring how bicycle infrastructure planning has become a key symbol of and site of conflict over uneven urban development John G Stehlin traces bicycling's rise in popularity as a key policy solution for American cities facing the environmental economic and social contradictions of the previous century of sprawl Using in depth case studies from San Francisco Philadelphia and Detroit he argues that the mission of bicycle advocacy has converged with and reshaped the urban growth machine around a model of livable environmentally friendly and innovation based urban capitalism While advocates envision a more sustainable city for all the deployment of bicycle infrastructure within the framework of the neoliberal city in many ways intensifies divisions along lines of race class and space Cyclescapes of the Unequal City speaks to a growing interest in bicycling as an urban economic and environmental strategy its role in the politics of gentrification and efforts to build more diverse coalitions of bicycle advocates Grounding its analysis in both regional political economy and neighborhood based ethnography this book ultimately uses the bicycle as a lens to view major shifts in today's American city

Deterritorializing/Reterritorializing Nancy Ares,Edward Buendía,Robert Helfenbein,2017-05-10 This volume features scholars who use a critical geography framework to analyze how constructions of social space shape education reform In particular they situate their work in present day neoliberal policies that are pushing responsibility for economic and social welfare as well as education policy and practice out of federal and into more local entities States cities and school boards are being given more responsibility and power in determining curriculum content and standards accompanied by increasing privatization of public education through the rise of charter schools and for profit organizations incursion into managing schools Given these pressures critical geography s unique approach to spatial constructions of schools is crucially important Reterritorialization and deterritorialization or the varying flows of people and capital across space and time are highlighted to understand spatial forces operating on such things as schools communities people and culture Authors from multiple fields of study contribute to this book s examination of how social political and historical dimensions of spatial forces especially racial ethnic and other markers of difference shape are shaped by processes and outcomes of school reform

Sustainable Peace in Northeast Asia Yong-Shik Lee,2023-09-05 Sustainable Peace in Northeast Asia examines the causes of lasting and complex tensions in the region from underlying political historical military and economic perspectives discusses their historical development and political economic implications for the world and explores possible solutions to build lasting peace The book is unique in that it approaches the topic from the historical perspective of each constituent country in the region Major global powers such as the United States and Russia have also closely engaged in the political and economic affairs of this region through a network of alliances diplomacy trade and investment The book also discusses the influence of these external powers over the crisis their political and economic objectives in the region their strategies and the dynamics that their engagement has created Both South Korea and North Korea have sought reunification of the Korean peninsula which will have a substantial impact on the region The book examines its justification feasibility and effects for the region The book discusses the role of Mongolia in the context of the power dynamics in Northeast Asia A relatively small country in terms of its population Mongolia has rarely been examined in this context Sustainable Peace in Northeast Asia makes a fresh assessment of its potential role

Unequal Learning Xin Xiang,2025 Inequality has been soaring across the globe in the past decades And the reproduction of inequality begins early in the life cycle in homes and schools In Unequal Learning Xin Xiang analyzes the different kinds of learning that goes on in four drastically different Chinese schools a rural school in a mountainous area a public school in an impoverished region of an emerging city a low cost private school serving rural migrants and a prestigious metropolitan public school that attracts the children of elite professionals and government

officials As she shows the different learning opportunities available in these four communities contribute to the widening gulf between the rising metropolitan middle class and China's working classes Within classrooms children in urban elite schools experience pedagogies drastically different from those in less privileged communities despite the common preoccupation with preparing for exams Outside classrooms urban elite children learn to lead collaborate and compete through a variety of organized activities while rural children acquire competency in farm and household work Though these particular schools are located in China Xiang demonstrates how these four Chinese schools and communities reflect global trends as much as local peculiarities Ultimately addressing these pervasive and deep rooted educational inequalities requires moving beyond the paradigms of closing achievement gaps and reducing learning poverty Xiang calls for a thorough rethinking of whose knowledge and contribution counts and what good schools look like in China and beyond Powerfully argued and deeply researched this will be essential reading not just for scholars of China but anyone interested in how education systems both reproduce and exacerbate inequality

A World More Concrete N.D.B. Connolly, 2014-08-25 Many people characterize urban renewal projects and the power of eminent domain as two of the most widely despised and often racist tools for reshaping American cities in the postwar period In *A World More Concrete* N D B Connolly uses the history of South Florida to unearth an older and far more complex story Connolly captures nearly eighty years of political and land transactions to reveal how real estate and redevelopment created and preserved metropolitan growth and racial peace under white supremacy Using a materialist approach he offers a long view of capitalism and the color line following much of the money that made land taking and Jim Crow segregation profitable and preferred approaches to governing cities throughout the twentieth century *A World More Concrete* argues that black and white landlords entrepreneurs and even liberal community leaders used tenements and repeated land dispossession to take advantage of the poor and generate remarkable wealth Through a political culture built on real estate South Florida's landlords and homeowners advanced property rights and white property rights especially at the expense of more inclusive visions of equality For black people and many of their white allies uses of eminent domain helped to harden class and color lines Yet for many reformers confiscating certain kinds of real estate through eminent domain also promised to help improve housing conditions to undermine the neighborhood influence of powerful slumlords and to open new opportunities for suburban life for black Floridians Concerned more with winners and losers than with heroes and villains *A World More Concrete* offers a sober assessment of money and power in Jim Crow America It shows how negotiations between powerful real estate interests on both sides of the color line gave racial segregation a remarkable capacity to evolve revealing property owners power to reshape American cities in ways that can still be seen and felt today
