Food Security in South Africa Sakiko Fukuda-Parr, Vivienne Taylor, 2015-11-10 The right to food is guaranteed in South Africa's Constitution as it is in international law Yet food insecurity remains widespread and persistent at levels much higher than in countries with similar levels of per capita GDP and development such as Brazil In this book leading local and international researchers on food security and related policy work have come together to create the first systematic and trans disciplinary analysis of food security and its multiple dimensions in South Africa and the southern African region Drawing on Amartya Sen's entitlement theory to identify the key drivers of hunger they see food insecurity as a chronic structurally based condition rather than only resulting from natural environmental disasters temporary economic shocks and household vulnerabilities The authors focus on a range of policy options and choices to provide short term and longer term solutions to the systemic causes of unemployment failing rural livelihoods and traditional subsistence production They also emphasise the linkages between the social and economic dimensions of food insecurity and use an integrative interdisciplinary approach to analyse the reasons why these conditions persist and what can be done to address them Importantly the book brings together work undertaken at local and national levels in new ways so that policy makers researchers human rights advocates and social and economic scholars are better able to make the links between macro and micro processes of development

Food Sovereignty and Urban Agriculture Anne Siebert, 2022-07-08 This book analyses the interplay of urban agriculture and food sovereignty through the innovative lens of the critical urban food perspective It focuses on the mobilisation of urban food producers as a powerful response to highly exclusionary dynamics in the agri food system including insufficient food access and disastrous land dispossessions This volume particularly aims to fill the gap in the current literature by engaging with food sovereignty discourses and movements in urban areas Related activism of urban food producers in the Global South remains underrepresented in practice and in literature Therefore this book engages with the lived realities of an urban agriculture initiative in George South Africa Building on theoretical notions of the right to the city and everyday forms of resistance the book illuminates how deprived food producers expose inequalities and propose alternatives The findings of in depth empirical research reveal that dwellers perceive farming as a mean to overcome historical segregation high food prices and unhealthy nutrition Hence they breathe life into food sovereignty in practice and suggest further alliances beyond the city The book will be of interest to scholars and students of alternative food politics agrarian transformation and food movements as well as rural urban intersections

UAS-Remote Sensing Methods for Mapping, Monitoring and Modeling Crops Francisco Javier Mesas Carrascosa, Joaquim João Sousa, 2021-04-22 The advances in unmanned aerial vehicle UAV platforms and onboard sensors in the past few years have greatly increased our ability to monitor and map crops The ability to register

images at ultrahigh spatial resolution at any moment has made remote sensing techniques increasingly useful in crop management. These technologies have revolutionized the way in which remote sensing is applied in precision agriculture, allowing for decision making in a matter of days instead of weeks. However, it is still necessary to continue research to improve and maximize the potential of UAV remote sensing in agriculture. This Special Issue of Remote Sensing includes different applications of UAV remote sensing for crop management, covering RGB, multispectral, hyperspectral, and light detection and ranging (LiDAR) sensor applications aboard UAVs. The papers reveal innovative techniques involving image analysis and cloud points. However, it should be emphasized that this Special Issue is a small sample of UAV applications in agriculture and that there is much more to investigate.

Sensing Approaches for Precision Agriculture Ruth Kerry, Alexandre Escolà, 2021-11-23. *Sensing Approaches for Precision Agriculture* aims to bring together the state of the art of the most popular sensing techniques and the current state of research on the application of sensors in Precision Agriculture. PA Sensing is of great value in PA because it provides cheap and immediate data for management. This book gives a broad overview of sensing in PA and a coherent introduction for new professionals and research scientists. Readers are introduced to the potential applications of a range of different sensors, how they should be used properly, and their limitations for use in PA. Chapters on specific topics and case studies provide depth and enable implementation of the methods by users. A general introduction about sensing techniques in PA is followed by Chapters 2-9 on the most important specific techniques in sensing, and Chapters 10-13 include mini case studies, each showing cutting edge applications for different sensing methods. Finally, there is an Epilogue on how we expect sensors and analysis to develop.

Information Systems Marinos Themistocleous, Maria Papadaki, 2022-02-15. This book constitutes selected papers from the 18th European Mediterranean and Middle Eastern Conference EMCIS 2021, which took place during December 8-9, 2021. The conference was initially planned to take place in Dubai, UAE, but had to change to an online event due to the COVID-19 pandemic. EMCIS covers technical, organizational, business, and social issues in the application of information technology and is dedicated to the definition and establishment of Information Systems (IS) as a discipline of high impact for IS professionals and practitioners. It focuses on approaches that facilitate the identification of innovative research of significant relevance to the IS discipline, following sound research methodologies that lead to results of measurable impact. The 54 full papers presented in this volume were carefully reviewed and selected from a total of 155 submissions. They were organized in topical sections named: Big Data and Analytics; Blockchain Technology and Applications; Cloud Computing; Digital Governance; Digital Services and Social Media; Emerging Computing Technologies and Trends for Business Process Management; Healthcare Information Systems; Information Systems security and Information Privacy Protection; Innovative Research Projects; IT Governance and Alignment and Management; and Organisational Issues in Information Systems.

Food Loss and Food Waste Michael Blakeney, Global food insecurity is a growing issue. At a time when the world's population is increasing and agricultural

production is challenged by climate change it is estimated that around a third of the food produced globally is lost or wasted This book examines the problem of food loss and waste FLW and the policies that could be enacted to remedy this fundamental global concern Hyphenations of Capillary Chromatography with Mass Spectrometry Peter Q.

Tranchida, Luigi Mondello, 2019-11-29 Hyphenations of Capillary Chromatography with Mass Spectrometry provides comprehensive coverage of capillary chromatography with mass spectrometry both single and multidimensional approaches The book examines nearly all capillary chromatography approaches combined with a variety of MS forms giving readers a wide and detailed view on current day analytical strategies and applications Of particular focus are novel developments in the field of MS such as the Orbitrap HR ToF ToF MS with variable electron impact energy fast MS MS and APGC technology Junior scientists conducting research on mono dimensional chromatography MS fundamental relationships and experienced analytical chemists working in conventional capillary chromatography and classical multidimensional chromatography will find this an ideal application based reference on the hyphenations of these domains Combines mass spectrometry with a range of chromatographic approaches Emphasizes the importance of both capillary chromatography and mass spectrometry methods thus stimulating separation scientists to fully exploit both analytical dimensions Authored by two of the world s leading analytical chemists who have a total of more than 40 years of experience in research and instruction *Feature Papers "Age-Friendly Cities & Communities: State of the Art and Future Perspectives"* Joost van Hoof, Hannah R.
