The Routledge Handbook on Crime and International Migration Sharon Pickering, Julie Ham, 2017-07-14 The Routledge Handbook on Crime and International Migration is concerned with the various relationships between migration crime and victimization that have informed a wide criminological scholarship often driven by some of the original lines of inquiry of the Chicago School. Historically migration and crime came to be the device by which Criminology and cognate fields sought to tackle issues of race and ethnicity often in highly problematic ways. However in the contemporary period this body of scholarship is inspiring scholars to produce significant evidence that speaks to some of the biggest public policy questions and debunks many dominant mythologies around the criminality of migrants. The Routledge Handbook on Crime and International Migration is also concerned with the theoretical, empirical and policy knots found in the relationship between regular and irregular migration, offending and victimization, the processes and impact of criminalization and the changing role of criminal justice systems in the regulation and enforcement of international mobility and borders. The Handbook is focused on the migratory fault lines between the Global North and Global South which have produced new or accelerated sites of state control, constructed irregular migration as a crime and security problem and mobilized ideological and coercive powers usually reserved for criminal or military threats. Offering a strong international focus and comprehensive coverage of a wide range of border, criminal justice and migration related issues, this book is an important contribution to criminology and migration studies and will be essential reading for academics, students and practitioners interested in this field.

Money, Markets, and Monarchies Adam Hanieh, 2018-09-13 Framed by a critical analysis of global capitalism, this book examines how the six states of the Gulf Cooperation Council are powerfully shaping the political economy of the wider Middle East. Through unprecedented and fine grained empirical research encompassing sectors such as agribusiness, real estate, finance, retail, telecommunications and urban utilities, Adam Hanieh lays out the pivotal role of the Gulf in the affairs of other Arab states. This vital but little recognised feature of the Middle East's political economy is essential to understanding contemporary regional dynamics, not least of which is the emergence of significant internal tensions within the Gulf itself. Bringing fresh insights and a novel interdisciplinary approach to debates across political economy, critical geography and Middle East studies, this book fills an important gap in how we understand the region and its place in the global order.

Chasing Archipelagic Dreams David R. Saunders, 2024-12-15 In *Chasing Archipelagic Dreams* David R Saunders demonstrates that the withdrawal of the British imperial state from Sabah did not result in the decolonization of the territory From the late 1940s to the 1960s international anti colonialism interacted with regional competition over Sabah to result in a paradoxical increase of British power and influence on the ground Meanwhile ethnic social and political heterogeneity in Sabah contributed to fragmentation and disunity undermining the development of a local anti colonial movement Instead a class of influential local elites seized power

as competing attempts by the Philippines Indonesia and Malaya to incorporate the territory into their respective archipelagic spheres grew in strength Due to these local and international rivalries Saunders argues Sabah s eventual merger with the Federation of Malaysia in 1963 prompted an extension of colonial style rule resource extraction the suppression of local autonomy and the imposition of an externally configured national identity Chasing Archipelagic Dreams underscores the significance of regional rivalries in the South China Sea and highlights the fate of subaltern communities bisected by post colonial borders

Steffes,2024-04-02 How inequality was forged fought over and forgotten through public policy in metropolitan Chicago As in many American metropolitan areas inequality in Chicagoland is visible in its neighborhoods These inequalities are not inevitable however They have been constructed and deepened by public policies around housing schooling taxation and local governance including hidden state government policies In Structuring Inequality historian Tracy L Steffes shows how metropolitan

inequality in Chicagoland was structured, contested, and naturalized over time even as reformers tried to change it through school desegregation, affordable housing, and property tax reform. While these efforts had modest successes in the city and the suburbs, reformers faced significant resistance and counter mobilization from affluent suburbanites, real estate developers, and other defenders of the status quo who defended inequality and reshaped the policy conversation about it. Grounded in comprehensive archival research and policy analysis, *Structuring Inequality* examines the history of Chicagoland's established systems of inequality and provides perspective on the inequality we live with today.
