IEA Civic Education Study CIVED 1999 2000 IEA's ICCS remains the only large scale international study dedicated to formal and informal civic and citizenship education in school. It continues to make substantial contributions to understanding the nature of the acquired civic knowledge, attitudes and participatory skills. It also discusses in depth how a wide range of countries prepare their young people for citizenship in changing political, social and economic circumstances. The next cycle of ICCS is planned for 2022. In this book, more than 20 national representatives and international scholars from Europe, Latin America, Asia and North America assess how the processes and findings of the 2009 and 2016 cycles of ICCS and CIVED 1999 2000 have been used to improve nations' understanding of their students' civic knowledge, beliefs, attitudes, current civic related behaviors and intentions for future participation in a comparative context. There are also chapters summarizing the secondary analysis of those studies' results, indicating their usefulness for educational improvement and reflecting on policy issues. The analyses and reflections in this book provide timely insight into international educational discourse, policy, practice and research in an area of education that is becoming increasingly important for many societies.
