Grade 9 Results For 2014:

Improving Primary Mathematics Education, Teaching and Learning Mellony Graven, Hamsa Venkat, 2017-01-19 This book focuses on how to improve the teaching and learning of primary level mathematics education within resource constrained contexts. It builds on two large numeracy projects within South Africa which speak to broader global concerns and highlight how research and development not only enables one to meet ethical imperatives but also explore how further interventions can be developed. Teacher and research communities must work together to create mutually beneficial relationships and establish a cohesive understanding of the requirements of primary mathematics education. **The Political Economy of**

Schooling in Cambodia Yuto Kitamura, D. Brent Edwards Jr., James H. Williams, Chhinh Sitha, 2016-01-28 In the most in depth look at education in Cambodia to date, scholars long engaged in research on Cambodia provide historical context and unpack key issues of high relevance to Cambodia and other developing countries as they expand and modernize their education systems and grapple with challenges to providing a quality and equitable education. **Lessons from the Kalahari** Monica Hendricks, 2020-05-05 *Lessons from the Kalahari* Tracking Teachers Professional Development explores how Northern Cape teachers who were enrolled in a Bachelor of Education in service course responded to three professional development modules specialising in mathematics education, English language teaching and Foundation Phase teaching respectively. Mainly through fine grained analyses of their classroom practice, the studies in this volume demonstrate how these teachers grappled with new content knowledge and pedagogical innovations to improve the quality of teaching in their classrooms. The chapters include case studies that range across a variety of pedagogical topics including mathematics and English teachers' classroom practices, involvement of parents of Foundation Phase learners and learners' autonomous mathematics learning. The book makes an original empirically based contribution to the understanding of the challenges confronting primary and secondary school teachers in remote rural parts of Northern Cape province, South Africa.

Education in Cambodia Vincent McNamara, Martin Hayden, 2022-05-14 This book is the most comprehensive account yet published about the education system in Cambodia. It covers all system levels and draws upon the knowledge and insights of a wide range of leading Cambodian and foreign scholars. The book focuses on how the system has developed and is making progress. Significant achievements over the past two decades are evident, but many problems remain, including the poor quality of teaching, research and institutional management. Underfunding is an ongoing obstacle, but so too is a bureaucratic culture of resistance to change, a history of weak governance and an anti-reform sentiment deriving from a teacher-centred and exam-driven curriculum. Achieving international standards must now be the system's highest priority. To this end, the system must rid itself of conservatism, complacency and manipulation by parochial vested interests. *Education in a New South Africa* Robert J. Balfour, 2015-09-24 A collaborative series with the University of Cambridge Faculty of Education highlighting leading edge research across Teacher Education, International Education, Reform and Language Education.
