Education J.K. Gilbert,C. Boulter,2012-12-06 Models and modelling play a central role in the nature of science in its conduct
in the accreditation and dissemination of its outcomes as well as forming a bridge to technology They therefore have an
important place in both the formal and informal science education provision made for people of all ages This book is a
product of five years collaborative work by eighteen researchers from four countries It addresses four key issues the roles of
models in science and their implications for science education the place of models in curricula for major science subjects the
ways that models can be presented to are learned about and can be produced by individuals the implications of all these for
research and for science teacher education The work draws on insights from the history and philosophy of science cognitive
psychology sociology linguistics and classroom research to establish what may be done and what is done The book will be of
