scores and ratings which make lending on a much greater scale possible It discusses how lending is shaped by the shadow of failure and the possibility that borrowers will break their promises and fail to repay their debts It reveals how credit markets have been shaped by public policy regulatory changes and various political factors And crucially it explains how credit interacts with economic inequality contributing to vast and enduring racial and gender differences which are only exacerbated by the widespread use of credit scores and ratings for big data and algorithmic decision making Bringing to life the complicated and abstract terrain of human interaction we call the economy The Economy of Promises is an important study of the tangle of indebtedness that for better or worse shapes and defines American lives

Experimentalist Governance Bernardo Rangoi,2023-08-09 What does non hierarchical governance mean Under what conditions are actors likely to engage in it Which trajectory best captures its long term evolution Through which mechanisms does it overcome gridlock To respond to these questions at the heart of regulatory governance Experimentalist Governance develops an analytical framework that draws on contemporary debates but seeks to overcome their limitations Notably it offers a definition of non hierarchical experimentalist governance that goes beyond institutional structures focusing attention on actors choices and strategies It shows that contrary to expectations functional and political pressures were more influential than distributions of

legal power and bolstered one another Strong functional demands and political opposition influence actors capacity of using powers which de jure might be concentrated in their own hands Indeed actors can use non hierarchical governance to aid learning and mould political support Conversely they may override legal constraints and impose their views on others insofar as they are equipped with confidence and powerful coalitions beforehand This book also challenges conservative views that non hierarchical governance is doomed to wither away showing that on the contrary it is often resilient Finally it demonstrates that far from being alternatives positive shadow of hierarchy and negative penalty default mechanisms to avoid gridlock are frequently complementary By analysing five crucial domains electricity gas communications finance and pharmaceuticals in the European Union an examination is made of when how and why non hierarchical institutions affect policy processes and outcomes Combining temporal cross sectoral and within case comparisons with process tracing this book ultimately illustrates the conditions trajectories and mechanisms of non hierarchical governance
