underlying conception of refugee children as not merely a vulnerable contingent of the displaced Syrian population but one that possesses a certain agency for change and progress In this vein the various contributions aim to not just de securitize the conversation on migration that frequently centres on the presumed insecurity that refugees personify They also de securitize the figure and image of the refugee Through the stories of the youngest and most vulnerable they demonstrate that refugee children are not mere opaque figures on who we project our insecurities Instead they embody potentials and opportunities for progress that we need to nurture as young refugees find themselves compelled to both negotiate the practical realities of a life in exile and situate themselves in changing and unfamiliar sociocultural contexts Drawing on extensive field research this edited volume points in the direction of a new rights based framework which will safeguard the future of these children and their well being Offering a comparative lens between approaches to tackling refugees in the Middle East and Europe this book will appeal to students and scholars of refugees and migration studies human rights as well as anyone with an interest in the Middle East or Europe

Fanon, Žižek, and the Violence of Resistance Zahi Zalloua, 2025-06-26 In a novel pairing of anti colonial theorist Frantz Fanon with Marxist Lacanian philosopher Slavoj Žižek Zahi Zalloua explores the ways both thinkers expose the violence of political structures This inventive exploration advances an anti racist critique describing how ontology operates in a racial matrix to produce some human bodies that count and others deemed not quite or non human that do not For Fanon and Žižek the violence of ontology must be met with another form of violence a revolutionary violence that delegitimizes the logic of the symbolic order and troubles its collective fantasies Whereas Fanon begins his challenge to ontology by exposing its historical linkages to Europe's destructive imperialist procedures before proceeding to stretch Marxism along with psychoanalysis to

account for the crushing neo colonial situation i ek premises his work on the refusal to accept the totality of ontology Because of these different points of intervention Fanon and i ek together offer a powerful and multifaceted assessment of the liberal anti racist paradigm whose propensity for identity politics and aversion to class struggle silence the cry of the dispossessed and foreclose radical change Avoiding contemporary separatist temptations decoloniality and Afropessimism and breaking with a non violent sentimentalist futurology that announces more of the same Fanon and i ek point in a different direction one that eschews identitarian thought in favor of a collective struggle for freedom and equality ICoSTA 2022 Bornok Sinaga,Darwin,Juniastel Rajagukguk,2023-01-16 We are delighted to present the Proceedings of the 4th International Conference on Science and Technology Applications ICoSTA 2022 that organized by Research and Community Service Centre of Universitas Negeri Medan LPPM UNIMED This conference has brought researchers academicians and practitioners from the national and international institutions to discuss and sharing around the big theme which is Innovation in Science and Technology for Sustainable Human Quality Development The ICoSTA2022 conference presents 4 distinguished keynote speakers with several expertation including of The Educational and Learning System Prof Dr Syawal Gultom M Pd Glass Technology and Materials Science Prof Dr Jakrapong Kaewkhao expert in the nuclear reactor technology there is Dr Eng Topan Setiadipura S Si M Si M Eng and expert in nanostructures for smart sensor devices held by Dr Mati Horprathum from Thailand In addition presenters come from various Government and Private Universities Institutions Academy and Schools Some of them are researcher from The National Atomic Energy Agency National Research and Innovation Agency Institut Technology Bandung Sriwijaya University Indonesian Technology Institute North Sumatera University University of Surabaya ITS UGM Udayana University Brawijaya University Jember University UNRI Nusa Cendana University Widya Mandala Surabaya Catholic University UPI and several institutions The additional information there are 23 institutions including from national and international were interested and get involved in this conference Besides that there are 86 papers received by committee some of which are presented orally in parallel sessions and others are presented through abstract The articles have been reviewed with double blind review before accepted and published by EAI publisher Grateful thanks to Director and Vice Directors and especially for Rector of Unimed who always coordinate the organizing committee and the team who keeps cooperating in running this conference We strongly believe that the ICoSTA 2022 conference provides a good forum for all researcher academician and practitioners to discuss all science and technology aspects that are relevant to sustainable human quality development We also expect that the future ICoSTA conference will be as successful and stimulating as indicated by the contributions presented in this volume Integrated Life-Cycle and Risk Assessment for Industrial Processes and Products Guido Sonnemann,Michael Tsang,Marta Schuhmacher,2018-10-10 Life cycle assessment is a methodology used to evaluate the environmental impacts of a product process or service during its life cycle and risk assessment is a tool to evaluate potential hazards to human health and the environment introduced by pollutant emissions

The United Nations Sustainable Development Goals call for among other objectives responsible consumption and production by decoupling environmental resource use and environmental impacts from economic growth and human well being Life cycle assessment and risk assessment are both analytical system approaches that allow scientists and other decision makers to address these issues and objectives according to the current understanding of environmental mechanisms This book is the first attempt to illustrate the existing interfaces between life cycle assessment and risk assessment and to indicate options for further integration of both tools The second edition Focuses on sustainability Considers new developments in life cycle assessment and environmental risk assessment over the last ten years at the international level Introduces broader concepts and discussions on integrative versus the complementary use of life cycle and risk assessments Extends the scope of integrated life cycle and risk assessments to critical raw materials Includes more case studies and discusses engineered nanomaterials Featuring contributions from leading experts Integrated Life Cycle and Risk Assessment for Industrial Processes and Products is a great reference for graduate students and professionals in environmental management and intends to catalyze communication between life cycle assessment and risk assessment experts and scientists in academia industry and governmental agencies The practical format of the book illustrated with flowcharts examples exercises and concrete applications makes it a useful manual for analyzing situations and making decisions Life Skills for All Learners
