Handbook of Research on Innovative Approaches to Early Childhood Development and School Readiness Betts, Anastasia Lynn, Thai, Khanh-Phuong, 2022-02-11 School readiness is as much about schools recognizing the existing capabilities and knowledge each child has when they enter school as it is about supporting children and families in their preparation for entering formal learning environments. Effective approaches that address learning variability must take these differences into account, recognizing and leveraging opportunities inherent in the child's ecosystem of resources. The *Handbook of Research on Innovative Approaches to Early Childhood Development and School Readiness* assembles the most current research and thought leadership on the ways in which innovative education stakeholders are working together to impact the most critical years in a child's life: the years leading up to and including kindergarten. Covering topics such as change, agency, experience, quality, and social-emotional development, this book is a crucial resource for educational researchers, child development professionals, school administrators, pre-K teachers, pre-service teachers, program managers, policymakers, non-profit service organizations, early childhood EdTech developers, curriculum developers, and academicians.

Sharing the Blue Crayon Mary Anne Buckley, 2023-10-10 Social and emotional learning is at the heart of good teaching, but as standards and testing requirements consume classroom time and divert teachers' focus, these critical skills often get sidelined. In *Sharing the Blue Crayon*, Mary Anne Buckley shows teachers how to incorporate social and emotional learning into a busy day and then extend these skills to literacy lessons for young children. Through simple activities such as read-alouds, sing-alongs, murals, and performances, students learn how to get along in a group, empathize with others, develop self-control, and give and receive feedback, all while becoming confident readers and

writers As Buckley shares Every day we ask young children to respectfully converse question debate and collaborate about literature science math problems history and more That s sophisticated stuff and requires sophisticated skills Social and emotional skills are essential to helping children communicate their knowledge and articulate their questions We must teach students how to build respectful caring classroom communities where students are supported and fully engaged in the learning and everyone can reach their potential In this fresh and original book Buckley captures the humor wonder honesty and worries of our youngest learners and helps teachers understand how to harness their creativity and guide their conversations toward richer expressions of knowledge Teachers of special populations will especially appreciate Buckley s successful strategies for reaching English language learners and children from high poverty homes who may not have strong foundations for academic discourse As Buckley reminds us By understanding one another orally and socially at first then using those community building exchanges to strengthen the skills of reading and writing we experience the authentic pride and sweet joys of learning understanding and connecting to one another **Canadian Journal of Forest Research** ,2015
