Johnson, 2025-03-18 How to create value with all the customers in a portfolio from the stronger relationships that increase profit margins to the weaker relationships that increase scale Which would you rather have a smaller watertight bucket of loyal customers or a larger leaky bucket of both loyal and not so loyal customers In *Customer Portfolio Management* Fred Selnes and Michael Johnson argue that for most companies and organizations the larger leaky bucket is more valuable While loyal customers are generally more profitable the weaker or leaky relationships in a portfolio provide scale economies and a source of future loyal customers The basic principle behind customer portfolio management CPM they explain is to view a company's market strategies as long term investments in the strength of relationships over an entire portfolio of current and future customers This book helps business leaders understand when and how much to focus on acquiring customers how to defend and leverage those relationships and how to convert some of these relationships into stronger more profitable ones The authors present an implementable framework for CPM that involves segmenting customers into strangers acquaintances friends and partners understanding the lifetime value or revenues and costs over time across relationship segments and determining when and how much to invest in customer acquisition relationship defense relationship leverage and relationship conversion Case studies and examples that include Amazon Apple IKEA and dozens of other companies are used along the way to illustrate effective portfolio management principles and growth strategies
