

Simply practical

The fully-automatic Hilti PR 16 rotating laser comes into its own in indoor applications, particularly where conventional, traditional measuring equipment is presently used. With the Hilti PR 16 rotating laser, many of these everyday tasks can be carried out by a single person in only a fraction of the time previously taken. Quite simply, this tool makes alignment in horizontal, vertical and inclined planes at a distance of up to 150 metres, as well as setting out and transferring right angles and measuring points, easier than ever before.

Versatility all round

Dependable

- Even when knocked off level by an impact or vibration, the horizontal and vertical monitoring system and shock cut-out prevent the transfer of incorrect readings.

Versatile

- One person can quickly and easily align horizontal, vertical and inclined planes or transfer measuring points at right angles.
- Variable speed of rotation for a wide range of indoor applications and optimal beam visibility up to 30 metres.

Convenient

- Setting up is straightforward and convenient as the PR 16 levels itself automatically ($\pm 5^\circ$ vertically and horizontally) for reliable accuracy.
- Conventional batteries provide power for up to 80 hours.

Simple

- Thanks to its self-explanatory control panel, working with the Hilti PR 16 is very straightforward.
- Measuring and aligning jobs that previously required several persons can be carried out more easily and more quickly by one person.

Save even more time and money with the PR 16's new "smart scan" function! At distances of up to more than 30 metres, with the aid of only a simple beam catcher plate, the laser beam can be stopped at the desired point where it is then conveniently projected as an easily visible line.

Efficiency counts!
